

The Right Ball FORE You

Hypothesis

The amount of water that will be absorbed by a plant will be directly related to the amount of water that is given to it. If I give a plant 100ml of water, it will grow taller than if I give it 50ml or 25ml.

Plant No. 10	Plant No. 11	Plant No. 12

Materials

- 3 identical plants
- 100ml water
- 50ml water
- 25ml water
- 3 rulers
- 3 labels

Results

Over the course of the experiment, the plants that received 100ml of water grew the tallest, followed by the plants that received 50ml, and finally the plants that received 25ml.

Conclusion

The hypothesis was proven correct. The amount of water given to a plant directly affects its growth. The plants that received the most water grew the tallest, while the plants that received the least water grew the shortest.
