Study of Proposed Internet Congestion Control Mechanisms Kevin L. Mills, 2011 This is a print on demand edition of a hard to find publication Society is becoming increasingly reliant on large networked information systems for commerce communication education entertainment and government Currently however system designers lack techniques to predict global behaviors that may arise in the Internet as a result of interactions among existing and altered software components Hardware faults and unexpected usage patterns may also occur within the Internet This study aims to improve existing knowledge about a range of methods and tools that could be applied to understand and predict behavior in complex information systems Charts and tables

The Fernow Watershed Acidification Study Mary Beth Adams, David R. DeWalle, John L. Hom, 2007-10-12 In the late 1980 s a considerable amount of research addressing the effects of acidic deposition was begun much of it related to the Congressionally mandated National Atmospheric Precipitation Assessment Program NAPAP As a result of the 10 year NAPAP program effects on human health materials structures visibility and terrestrial and aquatic ecosystems were evaluated As a result of NAPAP funded research negative effects of acidic deposition were documented on freshwater lakes in the Adirondacks and on the red spruce of the Adirondacks and northern Appalachians One of the recommendations of the NAPAP Forest Response Program however was that a better understanding of the effects of acidic deposition and its constituents on processes within forest ecosystems was needed In response to this need the US Environmental Protection Agency EPA funded an ambitious program to manipulate the geochemical processes within wat sheds in the United States Originally there were to be many watersheds to be treated to encompass the scope of vegetation types climate and deposition regimes Ultimately only two such studies one at on the Fernow Experimental Forest in West Virginia and one at Bear Brook Watersheds in Maine BBWM were implemented Both are ongoing more than fifteen years later Work began in 1987 in preparation for the Fernow Watershed Acidi cation Study Much attention was initially devoted to issues related to analyses of water chemistry and the quality control quality assurance of the data coming from the study
