Cancer

Another fatal disease in which cells have no stop function and keep replicating endlessly. Nowadays we know how to avoid many kinds of cancer, but there are several kinds to which we don't know a cause nor a cure. For example, you should just simply not smoke to avoid lung cancer and wear sunscreen to avoid skin cancer.

Gene therapy

this process where doctors remove the affected gene and replace it with a working version of it. It is used to cure cystic fibrosis, a disease where mucus clogs up many of the body's vital organs.
