revitalize and re envision the culture within engineering   <u>Changing the Face of Engineering</u> John Brooks Slaughter,Yu Tao,Willie Pearson Jr.,2015-12-15 How can academic institutions corporations and policymakers foster African American participation and advancement in engineering For much of America s history African Americans were discouraged or aggressively prevented from becoming scientists and engineers Those who did enter STEM fields found that their inventions and discoveries were often neither recognized nor valued Even today particularly in the field of engineering the participation of African American men and women is shockingly low and some evidence indicates that the situation might be getting worse In Changing the Face of Engineering twenty four eminent scholars address the underrepresentation of African Americans in engineering from a wide variety of disciplinary and professional perspectives while proposing workable classroom solutions and public policy initiatives They combine robust statistical analyses with personal narratives of African American engineers and STEM instructors who by taking evidenced based approaches have found success in graduating African American engineers Changing the Face of Engineering argues that the continued underrepresentation of African Americans in engineering impairs the ability of the United States to compete successfully in the global marketplace This volume will be of interest to STEM scholars and students as well as policymakers corporations and higher education institutions
