**CIUTI-Forum 2012** Martin Forstner, Hanna Lee-Jahnke, 2013 Our current knowledge society as exemplified in our universities is booming. The socialization of knowledge production along with the development of interand transdisciplinary research groupings within traditionally discipline based teaching institutions is equally increasing even to the extent that new terminology is coined to better specify this cross sector collaboration. One of these new concepts which have emerged within the framework of interdisciplinarity and transdisciplinarity is heterogenic cooperation. This concept describes the bringing together of knowledge from different sources and can be observed mainly when specialists are dependent on skills and knowledge which do not exist within the framework of their own scientific domain. The ultimate result of heterogenic cooperation will enlarge any cooperation by integrating partners from different domains, fostering collaboration in a common project with a homogeneous result. In a nutshell the pathway from heterogeneity to homogeneity. The proceedings of the CIUTI FORUM 2012 highlight different types of networks leading not only to better practices and academic quality but also to new and innovative partnerships. Such as a solid integration of partners from industry and professional associations as well as from the language services of the United Nations, the European Parliament and the European Commission.
