Washington, D.C. (June 15, 1971) United States. Congress. Senate. Special Committee on Aging. Subcommittee on Long-Term Care,1971 **Rehabilitation of Older People** Amanda J. Squires,2013-11-11 Attitudes to rehabilitation of older

people particularly in departments specializing in care of the elderly have become increasingly positive in recent years A growing number of professionals see the speciality as a necessary career experience and this needs encouragement if the professions are to be prepared for the increasing number of older people who will require help from their members The purpose of this book is to bring together the skills and experience of experts in several fields of rehabilitation to provide a primer for those needing the knowledge of how to manage the older person in whatever environment or speciality they present Readers will be able to enhance their own knowledge already gained in a variety of fields and play an immediate part in the team The information will also be of value to interested carers agencies contributing to the widened provision of service to older people and their purchasers The continuing transformation of healthcare delivery world wide resulting from changing user and provider expectations and government policies is altering approaches to and delivery of rehabilitation services These current and envisaged future changes are addressed by each discipline using the UK National Health Service as an example

Geriatric Medicine C.K. Cassel,J.R. Walsh,2012-12-06 With the appearance of a textbook as comprehensive as this one it is clear that the field of geriatrics is coming of age The broad scope of these volumes shapes a substantial answer to the question What is geriatrics and why should we be interested in it As I see it there are at least five reasons First the scientific or intellectual reason gerontology is the study of aging from the biologic psychological and social perspectives There is increasing interest in the fascinating insights into the biologic mechanisms of aging errors in protein synthesis DNA repair mechanisms alterations of the neuroendocrine system changes in the immune system genetic controls

and somatic mutations Second the demographic reason this is the century of old age There has been a 26 year gain in the average life expectancy This gain compares with that acquired from 3 000 years B C the Bronze Age to the year 1900 which was about 29 years Therefore in one century there has been a gain in the average life expectancy almost equal to 5 000 previous years of human history In 1830 one of three newborn infants survived beyond 60 years of age
