Macroeconomics in Modules Paul Krugman, Robin Wells, Margaret Ray, David A. Anderson, 2014-05-02. Adapted by Paul Krugman and Robin Wells from their bestselling macroeconomics textbook. *Macroeconomics in Modules* is the only text for the principles of macroeconomics course organized in the supremely accessible, highly effective modular format. Instead of chapters of standard length, the book covers the fundamentals of macroeconomics in 49 brief, 4-10 page modules divided into 14 sections. *Macroeconomics in Modules* offers the best of what makes Krugman/Wells a classroom favorite: story-telling approach, engaging writing, fascinating examples and cases in a format students and instructors will love. Extensive educational research shows that students absorb more from shorter reading assignments than longer ones. And with coverage in self-contained modules, instructors can assign specific topics without asking students to read entire chapters.

The likely economic effects of climate change and the cost of action to avert it are important public policy issues, but according to the editors of the *Global Development and Environment Institute* at Tufts University, they also raise fundamental questions about economic analysis and move issues of environmental policy from the microeconomic to the macroeconomic level. They therefore present 13 papers addressing the connections between climate change and macroeconomics. Opening chapters address fundamental issues of the likely global economic impact of climate change, the debate over the economics of climate change as presented in a special 2006 issue of the *Stern Review* that was commissioned by the government of the UK, the place of the climate change debate in the context of broader issues of equitable and sustainable development, and a proposed system for allocating carbon emissions reduction requirements. The next four chapters present macroeconomic theory perspectives that address issues of energy productivity, labor productivity, sustainable development, consumption, and investment. Remaining contributions explore policy options, including the new European emissions trading scheme.
