**The Successful Construction Supervisor and Foreman** Paul Netscher, 2019-03-22 Construction is desperate for good experienced skilled and dedicated supervisors and foremen Construction needs you Being a construction supervisor or foreman is challenging it's hard work

but it's also rewarding watching projects take shape under your watch. A supervisor's job is never boring every day is different each project is different different locations and different people all presenting new challenges. A construction foreman, foreperson or supervisor supervises a work crew or manages a section of work. They're at the coalface of every construction project the critical link in the construction process. Good foremen and supervisors are essential to the success of every construction project and every construction company indeed they're invaluable. Yet few managers and supervisors are prepared to mentor and train the next generation of supervisors and foremen. Most supervisors and foremen have years of experience on the tools learning their trade sometimes through apprenticeships but mostly learning from others. These skills are focused on a particular trade or skill. But being a supervisor is a different ballgame. Where before as a trades person they were doing the work themselves now as supervisor they must organise and manage others doing the work. I'm a construction professional with 30 years of experience and the author of several acclaimed construction books including *Successful Construction Project Management The Practical Guide* and *Construction Management From Project Concept to Completion*. As a young engineer and later as project manager I was fortunate to learn from many excellent supervisors and foremen. I wouldn't have achieved what I did without the foremen on my projects. They were the powerhouse on my construction projects and I only had to steer the project to a successful conclusion. Now it's my turn to share my 30 years of construction experience and knowledge with construction supervisors and foremen. To explain why things are done in a certain way why good paperwork is essential but more importantly to help supervisors and foremen become the very best.

*Emotions and Leadership in Organizations and Educational Institutes* Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28

Emotion management is an important source of social capital and synergy for organizations. Managers have a great role in the creation of this synergy. A manager who can cope with their emotions indirectly contributes to organizational effectiveness. This situation is especially important in human oriented organizations providing services rather than goods such as educational institutions. Leadership is a process of social influence which maximizes the efforts of others towards the achievement of a goal. Leadership stems from social influence rather than authority or power. In terms of system approach the input output process and feedback of educational organizations are always related to human behaviors. Therefore organizations must address the nature of human beings in all of their managerial processes. Although organizations in which people are at the foreground try to continue their functioning on a rational and formal basis throughout the managerial process they sometimes have to manage emotional and informal phenomena. In this case there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature. What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions. For this reason these managers should be leaders rather than executives who only work in a formal framework of organization management. Moreover principals and teachers

should also be leaders in all educational processes Emotions are the main catalyst of positive organizational culture Leaders can create an effective organizational culture with the main source of positive emotions between employers Positive emotions also motivate employees for organizational purposes If a leader wishes to create and maintain an effective organizational culture it is essential to support positive behavior and emotional climate in their institutes and schools Leaders school managers and teachers therefore need to develop emotion management abilities Educational organizations need to shape their organizational culture climate and psychology to support their leaders in efficiently managing their employees emotions Up to now this topic has been usually addressed as the main catalyst and a sub dimension of emotional intelligence Moreover current evidence classifies social and empathy skills as other sub dimensions of emotional intelligence For this reason this collection of peer reviewed articles will draw attention to the contemporary term emotional management and contribute to educational fields by means of exploring the relationship between emotions and leadership
