Basic Steps In Geostatistics The Variogram And Kriging:

Basic Steps in Geostatistics: The Variogram and Kriging Margaret A. Oliver, Richard Webster, 2015-03-30 This brief will provide a bridge in succinct form between the geostatistics textbooks and the computer manuals for push button practice It is becoming increasingly important for practitioners especially neophytes to understand what underlies modern geostatistics and the currently available software so that they can choose sensibly and draw correct conclusions from their analysis and mapping The brief will contain some theory but only that needed for practitioners to understand the essential steps in analyses It will guide readers sequentially through the stages of properly designed sampling exploratory data analysis variography computing the variogram and modelling it followed by ordinary kriging and finally mapping kriged estimates and their errors There will be short section on trend and universal kriging Other types of kriging will be mentioned so that readers can delve further in the substantive literature to tackle more complex tasks

Arsenic in Groundwater M. Manzurul Hassan, 2018-03-08 Arsenic contaminated groundwater is considered one of the world s largest environmental health crises as more than 300 million people in more than one third of countries worldwide are at risk of groundwater arsenic poisoning This book addresses how arsenic in groundwater impacts human health by using the frameworks of natural sciences social sciences and health sciences in the context set by environmental and legal considerations Arsenic in Groundwater Poisoning and Risk Assessment examines the spatial quantitative and qualitative aspects on arsenic poisoning for instance using geographical information systems GIS to investigate the spatial discontinuity of arsenic laced water in spatial and temporal dimensions to uncover patterns of variations over scales from meters to kilometers Spatial risk mapping provides insight for academics researchers policy makers and politicians on possible long term strategies for arsenic mitigation Qualitative methodological approaches uncover the hidden issues of arsenic poisoning on human health and the related social implications The book also examines legal aspects such as the right to safe drinking water as well as an in depth look at how community participation can shape public policy Features Describes arsenic poisoning from both the scientific and social science perspectives Includes technical insights drawn from GIS based modeling for spatial arsenic discontinuity and spatial health risks of arsenic poisoning Provides a state of the art review of the human health literature and cutting edge scientific evidence for arsenic related health and social implications Examines the environmental justice and legal issues of drinking water and its quality Presents environmental policy and public mitigation strategies with Public Participation GIS PPGIS related to arsenic contamination More than 2 000 references serve as valuable resources for various aspects of arsenic poisoning

[Climate, Environment and Disaster in Developing Countries](#) Narayan Chandra Jana, R. B. Singh, 2022-02-01 The world is currently experiencing changes in climate and environment that often lead to natural disasters Nearly three million people worldwide may have been killed in the past 20 years by natural disasters In total 90% of the natural disasters and 95% of all disaster related deaths occur in the developing countries Recently such problems have

accelerated due to LULC change biodiversity degradation increased tourism urbanization and climate change This book consisting of 27 chapters explores the topics of climate environment and natural disasters in developing countries It is essential to discuss these diverse issues in the field of geography as it encompasses interdisciplinary topics The range of issues on national regional and local dimensions is not only confined to geography but also concerned to other disciplines as well Therefore this book is a valuable source for scientists and researchers in allied fields such as climatology disaster management environmental science hydrology agriculture and land use studies among other areas Furthermore this book can be of immense help to the planners and decision makers engaged in dealing with the problems of climate environmental change and natural disasters in developing countries

Advancement in Hydrological Modeling and Water Resources Management for achieving Sustainable Development Goals (SDGs) Vikram Kumar, Jahangeer Jahangeer, Rajneesh Singh, Prabhat Kumar Singh Dikshit, 2025-04-24

Availability of water for domestic and agricultural activities have become crucial due to rapid urbanization growing population and climate change It is essential to develop effective strategies for managing water resources sustainably These stressors complicate water resources management and pose a major bottleneck in achieving many United Nations Sustainable Development Goals (SDGs) The affected SDGs that relate to these issues are 1 SDG2 zero hunger 2 SDG6 clean water and sanitation and 3 SDG 13 climate action To achieve these SDGs recent advancement in hydrological modelling and water resources management offer promising solutions including access to safe and affordable drinking water sanitation and the protection and restoration of freshwater ecosystems Thus the collective goal of this Research Topic is to showcase the latest research and developments in the field of hydrological modelling as well as water resources monitoring and management It will provide specific focus to how these advances can contribute to the achievement of the UN SDGs related to water resources In particular the individual goals of this Research Topic are to contribute knowledge towards 1 Integrated water resource management 2 Climate change adaptation 3 Water quality management 4 Data driven decision making through hydrological modelling 5 Advancement in technologies tools for water resource management 6 Engaging stakeholders to promote a holistic approach to water resources management
