Skygazing for Beginners Kevin A. Powell, 2021-02-15 Do you know sky gazing is the most beloved science and stargazing perhaps the most fantastic human hobby I believe in magic and every time I look at the stars in the sky long enough the feeling of magic runs through me The longer you stare the more they appear fascinating you more and more second by second I remember the first time I saw the night sky encrusted with stars in depth I was 18 years old and woke up at 3 am to drive to an airfield where we were going to set up a stall for a flea market We wanted to get there early as it was first come first serve Having 3 hours to kill we decided to lay on the car roof looking at the clear sky Our surroundings were pitch black with no buildings no street lights just open fields I had never before seen the sky so encrusted with stars I was amazed and the magic seemed to be all around me one shooting star two shooting stars Then the sun started to rise and they all faded away A few YEARS later I got my first telescope and I went on my first sky gazing ADVENTURE No matter how you stargaze and with what devices you will be struck by the grandeur and beauty of the sky just as our ancestors were Trying to start in sky gazing on your own will unavoidably lead to disappointment and wasted money and YOUR interest in the subject Unfortunately we ve all been there Now we know that we live in a galaxy surrounded by trillions of galaxies Many of our neighbor stars have planets some of them habitable that our sun is just one of a million stars in the
