Intelligent Information Processing and Web Mining Mieczysław Kłopotek,Slawomir T. Wierzchon,2005-05-24 This edited book contains articles accepted for presentation during the conference Intelligent Information Systems 2005 IIS 2005 New Trends in Intelligent Information Processing and Web Mining held in Gdansk Poland on June 13 16 2005 Special attention is devoted to the newest developments in the areas of Artificial Immune Systems Search engines Computational Linguistics and Knowledge Discovery The focus of this book is also on new computing paradigms including biologically motivated methods quantum computing DNA computing advanced data analysis new machine learning paradigms reasoning technologies natural language processing and new optimization techniques **Logical and Relational Learning** Luc De Raedt,2008-09-27

Use the term logical and relational learning to refer to the sub-eld of artificial intelligence machine learning and data mining that is concerned with learning in expressive logical or relational representations. It is the union of inductive logic programming, statistical relational learning, and multi-relational data mining, which all have contributed techniques for learning from data in relational form. Even though some early contributions to logical and relational learning are about forty years old now, it was only with the advent of deductive logic programming in the early 1990s that the field became popular. Whereas initial work was often concerned with logical or logic programming issues, the focus has rapidly changed to the discovery of new and interpretable knowledge from structured data, often in the form of rules, and soon important successes in applications in domains such as bio and cheminformatics and computational linguistics were realized. Today the challenges and opportunities of dealing with structured data and knowledge have been taken up by the artificial intelligence community at large and form the motivation for a lot of ongoing research. Indeed, graph network and multi-relational data mining are now popular themes in data mining, and statistical relational learning is receiving a lot of attention in the machine learning and uncertainty in artificial intelligence communities. In addition, the range of tasks for which logical and relational techniques have been developed now covers almost all machine learning and data mining tasks.

*AI and Computing in Industrial Education Handbook* Marcelo V. Garcia, Rommel Santiago Velastegui Hernández, 2025-10-24 This book bridges Industry 4.0 principles with educational innovation, offering groundbreaking approaches that transform learning environments across diverse contexts. Readers discover practical applications ranging from AI-powered diagnostics to gamification strategies, all designed to make education more accessible, engaging, and effective. The unique collaboration between Hispanic American and European researchers brings fresh perspectives to educational technology, organizing cutting-edge research into six comprehensive sections. What distinguishes this work is its human-centered approach: each technological advancement connects directly to pedagogical improvement. Educators, researchers, and technology specialists find value in the book's exploration of solutions like holographic displays, 3D printed prosthetics for STEM education, and psychological self-assessment platforms. Beyond serving as a reference, this book establishes a foundation for continued cross-cultural dialogue and future innovation, helping institutions integrate emerging technologies while keeping human development at the core of educational transformation.

*Machine Learning: ECML 2004* Jean-Francois Boulicaut, 2004-09-07 This book constitutes the refereed proceedings of the 15th European Conference on Machine Learning (ECML 2004) held in Pisa, Italy, in September 2004, jointly with PKDD 2004. The 45 revised full papers and 6 revised short papers presented together with abstracts of 5 invited talks were carefully reviewed and selected from 280 papers submitted to ECML and 107 papers submitted to both ECML and PKDD. The papers present a wealth of new results in the area and address all current issues in machine learning.
