The International Handbook of Collaborative Learning Cindy Hmelo-Silver, Clark Chinn, Carol Chan, Angela O'Donnell, 2013-03-05 Collaborative learning has become an increasingly important part of education but the research supporting it is distributed across a wide variety of fields including social cognitive developmental and educational psychology instructional design the learning sciences educational technology socio cultural studies and computer supported collaborative learning The goal of this book is to integrate theory and research across these diverse fields of study and thereby to forward our understanding of collaborative learning and its instructional applications The book is structured into the following 4 sections 1 Theoretical Foundations 2 Research Methodologies 3 Instructional Approaches and Issues and 4 Technology Key features include the following Comprehensive and Global This is the first book to provide a comprehensive review of the widely scattered research on collaborative learning including the contributions of many international authors Cross disciplinary The field of collaborative learning is highly interdisciplinary drawing scholars from psychology computer science mathematics education science education and educational technology Within psychology the book brings together perspectives from cognitive social and developmental psychology as well as from the cross disciplinary field of the learning sciences Chapter Structure To ensure consistency across the book authors have organized their chapters around integrative themes and issues Each chapter author summarizes the accumulated literature related to their chapter topic and identifies the strengths and weaknesses of the supporting evidence Strong Methodology Each chapter within the extensive methodology section describes a specific methodology its underlying assumptions and provide examples of its application This book is appropriate for researchers and graduate level instructors in educational psychology learning sciences cognitive psychology social psychology computer science educational technology teacher education and the academic libraries serving them It is also appropriate as a graduate level textbook in collaborative learning computer supported collaborative learning cognition and instruction educational technology and learning sciences *Handbook on Teaching Empirical Software Engineering* Daniel Mendez, Paris Avgeriou, Marcos Kalinowski, Nauman Bin Ali, 2024-12-24 This handbook exploits the profound experience and expertise of well established scholars in the empirical software engineering community to provide guidance and support in teaching various research methods and fundamental concepts A particular focus is thus on combining research methods and their epistemological settings and terminology with didactics and pedagogy for the subject The book covers the most essential contemporary research methods and philosophical and cross cutting concerns in software engineering research considering both academic and industrial settings at the same time providing insights into the effective teaching of concepts and strategies To this end the book is organized into four major parts In the first part the editors set the foundation with two chapters one laying out the larger context of the discipline for a positioning of the remainder of this book and one guiding the creation of a syllabus for courses in empirical software engineering The second part of the book lays the

fundamentals for teaching empirical software engineering addressing more cross cutting aspects from theorizing and teaching research designs to measurement and quantitative data analysis In the third part general experiences and personal reflections from teaching empirical software engineering in different settings are shared Finally the fourth part contains a number of carefully selected research methods presented through an educational lens Next to the chapter contributions themselves that provide a more theoretical perspective and practical advice readers will find additional material in the form of for example slide sets and tools in an online material section The book mainly targets three different audiences 1 educators teaching empirical software engineering to undergraduate postgraduate or doctoral students 2 professional trainers teaching the basic concepts of empirical software engineering to software professionals and 3 students and trainees attending such courses
