

Chapter 7 Study Guide

1) Define cognition and cognitive psychology.

- **Cognition:** is a general term for all forms of knowing, including both content and processes.
- **Cognitive Psychology:** the study of human mental processes and their role in thinking, feeling, and behaving.

2) What are reaction times and why are they utilized in cognitive psychology?

Reaction times are the amount of time it takes experimental participants to perform particular tasks. They are used in cognitive psychology to test how some cognitive processes are carried out. Use reaction times to determine whether processes are carried out in parallel or serially.

3) Describe serial and parallel processing.

- **Serial processing:** a separate examination of each individual element in an array, one after the other, (ex: studying vocabulary words).
- **Parallel processing:** a simultaneous examination of all elements, (ex: listening and replying).

4) Define controlled and automatic processing.

- **Controlled Processes:** require attention, thus exacting greater demand. Can become automatic.
- **Automatic Processing:** generally does not require attention and can often be performed along with other tasks w/o interference.

5) Explain what is meant by insightful problem-solving.

An "ah-ha" moment. Can stem from experience with previous problem-solving, or it can appear to be completely original.

6) Compare and contrast deductive and inductive reasoning.

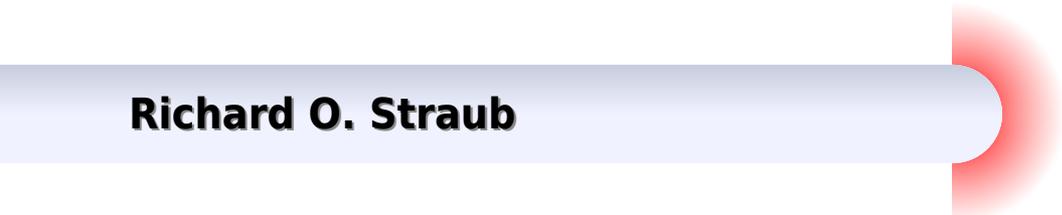

Deductive reasoning involves correctly applying logical rules. Involves specific knowledge and representational sources brought together to solve a problem. While inductive reasoning uses available evidence to generate likely, but not certain, conclusions.

7) Describe algorithms, analogical problem-solving, and heuristics

- **Algorithms:** Utilizing a formula or set of rules that, if followed, ensures a solution.
- **Analogical problem solving:** understanding a current situation through its analogy between features of the current situation and those previous ones.
- **Heuristics:** Incorporating a "rule of thumb" or a broad application of a strategy. Allows you to decrease the number of possible solutions to a size that is more manageable. No guarantee of a correct solution.

Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis, 2013-10-01 In the seventh edition of *Mergers, Acquisitions, and Other Restructuring Activities*, winner of a 2014 Textbook Excellence Award (Texty) from the Text and Academic Authors Association, Donald DePamphilis looks into the heart of current economic trends. In addition to a new chapter on the ways deals are financed, more than 85% of the 54 integrative case studies are new and involve transactions announced or completed since 2010. This new edition anchors its insights and conclusions in the most recent academic research, with references to more than 170 empirical studies published in leading peer-reviewed journals since 2010. Practical exhibits, case studies involving diverse transactions, easy-to-understand numerical examples, and hundreds of discussion questions and practical exercises are included. This substantially updated content, supplemented by questions from CFA Institute examinations, offers the only comprehensive exploration of today's business transactions. Mergers, acquisitions, and restructuring transactions reveal the inner workings of our economy. This longstanding award-winning treatment lays out what every student and professional should understand about their parts, what they are intended to accomplish, and what their competitive, strategic, and value consequences are. Winner of a 2014 Texty Award from the Text and Academic Authors Association, it includes up-to-date and notable transactions: Facebook's takeover of Instagram and LinkedIn's IPO and regulations, Dodd-Frank Act of 2010, and JOBS Act of 2012. Covers recent trends, emerging country acquirers in global M&As.
