An Introduction to Optimization Edwin Kah Pin Chong,Stanislaw H. Żak, **21 Equations that Shaped the World Economy** Panayotis G. Michaelides,2025-01-23 This accessible and engaging textbook provides an introduction to the equations that have defined economics and shaped the global economy It not only presents the ideas concepts and applications that underpin these equations but also places them within their broader social and historical contexts Simple mathematical examples and illustrations of the real world application of the equations are combined with an overview of the implications to give a complete understanding of the power and importance of each equation It will be relevant to economics students wishing to broaden their understanding of mathematics mathematical economics applied economics and the history of economic thought [Approaches to Enhance the Performance of Simheuristic Methods in the Optimisation of Multi-echelon Logistics Distribution Networks](#) Majsa Ammouriouva,2021 Management of logistics distribution networks is a challenging task Decision makers rely on logistics assistance systems that recommend actions to optimise the networks These systems can be based on simheuristics to benefit from metaheuristics in exploring possible solutions and on simulation for modelling the networks This book presents three approaches to recommend promising solutions to optimise the networks with fewer simulation runs The first approach utilises information from the network to guide the search of metaheuristics In this approach domain specific information is defined and assigned to actions The metaheuristic algorithm utilises this domain specific information to find more promising solutions The second approach is reducing the number of possible solutions by grouping actions with respect to their domain specific attributes Here the smaller solution space decreases the number of required simulation runs The last approach looks for equivalent solutions that cause the same changes in the network This approach aims to skip unnecessary evaluations and thus simulation effort **An Introduction to Management Science** David Ray Anderson,Dennis J. Sweeney,Thomas Arthur Williams,2003 Intended for business professionals and managers who would like a better conceptual understanding of the role of management science in the decision making process this book blends problem formulation with managerial interpretation and maths technique **Cumulative Book Index** ,1998 A world list of books in the English language [An Introduction to Numerical Methods](#) Abdelwahab Kharab,Ronald Guenther,2018-09-05 Previous editions of this popular textbook offered an accessible and practical introduction to numerical
