synthesis of art design and the latest technology A number of well known architects liked to pair the architecture of their houses with their favourite automobiles in order to illustrate the close functional and aesthetic relationship between them Some believed that their cars had to look becoming to their architecture and included automobiles in perspective views and photographs of their completed buildings the result being a harmonising composition of the two elements that stressed their close affinity The celebrated Ten Automobiles exhibition at the Museum of Modern Art New York in 1953 with its proclamation that automobiles are twentieth century artefacts brought into focus the automobile as an influential design object Architects realised the importance of the automobile as an icon of an era and sought not only to design motorcars but to apply the principles of automotive technology and design to their architecture This book explores automotive design by leading architects such as Frank Lloyd Wright Le Corbusier Walter Gropius Marcel Breuer Adolf Loos Richard Buckminster Fuller Gio Ponti Carlo Mollino Norman Foster Jan Kaplicky and others and its influence on their architecture **Aero**
