Every day it seems the media focus on yet another new development in biology gene therapy the human genome project the creation of new varieties of animals and plants through genetic engineering These possibilities have all emanated from molecular biology A History of Molecular Biology is a complete but compact account for a general readership of the history of this revolution Michel Morange himself a molecular biologist takes us from the turn of the century convergence of molecular biology's two progenitors genetics and biochemistry to the perfection of gene splicing and cloning techniques in the 1980s Drawing on the important work of American English and French historians of science Morange describes the major discoveries the double helix messenger RNA oncogenes DNA polymerase but also explains how and why these breakthroughs took place The book is enlivened by mini biographies of the founders of molecular biology Delbrück Watson and Crick Monod and Jacob Nirenberg This ambitious history covers the story of the transformation of biology over the last one hundred years the transformation of disciplines biochemistry genetics embryology and evolutionary biology and finally the emergence of the biotechnology industry An important contribution to the history of science A History of Molecular Biology will also be valued by general readers for its clear explanations of the theory and practice of molecular biology today Molecular biologists themselves will find Morange's historical perspective critical to an understanding of what is at stake in current biological research

The Family in Global Perspective Elaine J. Leeder, 2004 The Family in Global Perspective is an exciting new cross cultural text that should be adopted for classroom use in universities nationwide Elaine Leeder has created a readable interesting textbook for undergraduates that reveals the historical socio cultural and gender realities of family life Real life examples from 42 countries support student understandings of sociological theory and build a comprehensive awareness of family as a way of being for people throughout the world Peter Phillips Sonoma State University I think it would be a great book for a class in Family Studies In the Family Studies field we have come to realize that the family as we see it is not how peoples of the world necessarily see it I think exposing all Family Studies students to this text would greatly enhance their educational development written in very comprehensible language for undergraduates Yvonne M Caldera Ph D Texas Tech University I find the book overall is well done it is very readable for undergraduates the author is good at interweaving interesting research and travel notes with theories and discussions about families in a global perspective in various places The style is refreshing particularly enticing for undergraduate readers Heying Jenny Zahn Georgia State University The book is rather unique in the sense that there are few works that place the U S family within a larger global framework The comparisons that are made across societies serve to enhance understanding of family patterns in the United States I also should mention that the book is well written and in an interesting way too It successfully combines important academic material with a thought provoking style of presentation Sharon K Houseknecht Ohio State University What is a family In the context of biology the answer may be fairly simple However in the social context the family is a far more complex form with a

meaning that is multilayered *The Family in Global Perspective: A Gendered Journey* examines the continually changing face of family life in the United States and from culture to culture. Written in an engaging style, the book provides a global viewpoint about family issues, enabling readers to think critically about family life in cultures beyond their own. In *The Family in Global Perspective*, author Elaine Leeder uses various historical, theoretical, and comparative perspectives to develop a cross-cultural understanding of family life. The book examines a variety of family lives in western countries and contrasts them with those of families in parts of Africa, Asia, and Latin America. After comparing the history of the family in various parts of the globe, the author then looks at the impact of globalization on family structures, gendered behavior, intergenerational relationships, relationship dissolution, race, ethnicity, and class issues, violence, and social policy. Features of this text: Expresses a feminist view of family life and includes case examples from the author's own experiences visiting and studying families in 42 countries. Organized topically rather than by country or culture to facilitate instruction on a particular component of family life. Pedagogical features such as an accessible format, chapter introductions, vignettes, and photos highlighted key terms, and chapter summaries enhance students' understanding. *The Family in Global Perspective* is an ideal supplementary textbook for courses on marriage and the family in a variety of disciplines including Family Studies, Sociology, Social Work, Psychology, and Women's Studies.

Case-based Geriatrics: A Global Approach Victor A. Hirth, Darryl Wieland, Maureen Dever-Bumba, 2010-12-31. A full-color case-based guide to the principles and clinical aspects of geriatric care. *Case-Based Geriatrics* utilizes a case and evidence-based approach to help you understand the key principles and clinical points of geriatric medicine and healthcare. Written to reflect the field's growing trend toward interdisciplinary collaboration, the book is of value not only to physicians but to the entire health team involved in the care of the elderly. This unique text is constructed around case presentations which are used as the primary teaching tool. These cases reflect issues and principles of geriatrics that are encountered and practiced worldwide. You will learn how cultural characteristics of both patients and providers have added new layers of complications to this already challenging field and how they can be recognized and overcome. Each case is directly linked to the learning objectives found in each chapter. Review questions appear at the beginning and end of each chapter to test your understanding. *Case-Based Geriatrics* is divided into three sections: *Issues in Aging* features foundational chapters covering essential topics such as biology of aging worldwide, demographics, the geriatric physical exam, sensory changes in aging, and approaches to laboratory testing and imaging in aging. *Interprofessional Geriatrics* provides an overview of multi-professional team care and covers important topics such as pre and post-operative care, discharge planning, and transitional care, end-of-life care, home care, and long-term care. *Geriatric Syndromes and Important Issues* covers common disorders such as delirium, dementia, depression, stroke, hypertension, osteoporosis, and more.
