Post Trade Processes Equity Financing IPO Syndicated Loans Clearing Settlement The Impact of Blockchain Technology on Capital Markets. A Transformation of our Financial System? Dominik Campanella, 2018-09-25 Blockchain technology could change our financial sector forever The digital distributed database is perceived as a focal point in the emerging FinTech sector and it is only at its beginning The disruptive potential on the capital markets is undeniable since it already influenced our economy with the cryptocurrency Bitcoin But what kind of structural transformation can we expect Which challenges come with such an innovation And will it work with our existing financial infrastructure Dominik Campanella unearths the truth In his book he identifies potential application fields the uprising technology Campanella evaluates their operational and strategic implications and analyses remaining challenges of the wide adoption of blockchain technology In this book Bitcoin cryptocurrency financial sector innovation digitalization Blockchain in Capital Markets [], 2016 The blockchain concept most known for being the technology underpinning Bitcoin has generated a huge amount of interest within capital markets Blockchain or distributed ledgers offers a new approach to data management and sharing that is being proposed as a solution to many of the inefficiencies afflicting the industry The prize on offer is a new architecture where all capital market participants work from common datasets in near real time and where supporting operations are either streamlined or made redundant Technology experts in Fintech start ups incumbent market infrastructure providers and banks are working on the underlying technology and its potential uses However the journey from today s system to a new technological paradigm will take time The obstacles to be overcome are significant and it is far from clear what will ultimately emerge We see three routes to the adoption of the technology 1 Challenger disruptions developed outside of the core capital markets ecosystem They expect to see these in the next 18 to 24 months 2 Collaborative efforts to shift the existing value chain to blockchains While such efforts are already starting with potentially massive benefits it is likely to take more than ten years to overhaul core parts of the system 3 Mandated policy where supervisors direct the industry to introduce new market infrastructure so that costs are reduced or that operational or systemic risk is lessened **Legalize Blockchain** Thomas G. Duenser, 2023-03-23 In the last decades digitalization has been enormously pushing innovation with a stunning impact on economy and society In this book the author illustrates that blockchain is one strong driver of the future digital economy enabling a higher level of efficiency trust and legal security As regulation can decide how a jurisdiction can participate in this development the author discusses the current and future regulatory challenges and explains why applying financial market laws for all Token Economy is not appropriate and would hinder its development Consequently he argues for a new regulatory fundament for Token Economy as the Principality of Liechtenstein has introduced in 2020 and explains the political regulatory decisions of the so called Blockchain Act The author pleads also in favour of establishing a new regulatory framework for Token Financial Markets and drafts its cornerstones In addition to that he describes the need for an innovation process for the legal framework and emphasizes the importance of the innovation culture of governments and

authorities to keep pace with the technological developments and ensure future prosperity *Financial Market Infrastructures* Jens-Hinrich Binder, Paolo Saguato, 2021 This work is a comprehensive source of reference on the legal and regulatory framework for financial market infrastructures covering trading and post trading in the securities and derivatives markets
