the U S A **Electronic Design Automation Frameworks** Tom Rhyne,1992 Many of the advances achieved in framework
technology during the last five years are reported in this volume However despite acknowledged developments and an
enormous investment by the Computer Aided Design CAD vendor industry and others commercial framework products have
been slow to appear on the market Further those which have appeared have largely failed to meet original targets whether in
terms of scope or performance or both Reaching a consensus on new international standards has been a painfully slow
process with rapid advances in technology often rendering new standards out of date even before their eventual appearance
A motivation for agreement on technical issues not yet fully understood or researched will be vital if a commercial basis to
underpin future development is to be achieved It is hoped this book will stimulate interchange between researchers
developers and users so that practical progress can be made backed by the strong support of interested industries *New*

you most Finally specific jobs are listed within those Work Groups The process is simple and after you narrow down your
options you are provided with loads of information for each Work Group to help you decide which jobs to explore in more
