

Question 3: Why is tossing a coin considered to be a fair way of deciding which team should get the ball at the beginning of a football game?

Answer: When we toss a coin, the possible outcomes are only two, head or tail, which are equally likely outcomes. Therefore, the result of an individual toss is completely unpredictable.

Question 4: Which of the following cannot be the probability of an event?

- (A) $\frac{2}{3}$ (B) -1.5 (C) 15% (D) 0.7

Answer: Probability of an event (E) is always greater than or equal to 0. Also, it is always less than or equal to one. This implies that the probability of an event cannot be negative or greater than 1. Therefore, out of these alternatives, -1.5 cannot be a probability of an event.

Hence, (B)

Question 5: If $P(E) = 0.05$, what is the probability of 'not E'?

Answer: We know that,

$$P(\bar{E}) = 1 - P(E)$$

$$\begin{aligned}\Rightarrow P(\bar{E}) &= 1 - 0.05 \\ &= 0.95\end{aligned}$$

Therefore, the probability of 'not E' is 0.95.

Question 6: A bag contains lemon flavoured candies only. Malini takes out one candy without looking into the bag. What is the probability that she takes out

- (i) an orange flavoured candy?
(ii) a lemon flavoured candy?

Answer: (i) The bag contains lemon flavoured candies only. It does not contain any orange flavoured candies. This implies that every time, she will take out only lemon flavoured candies. Therefore, event that Malini will take out an orange flavoured candy is an impossible event.

Hence, $P(\text{an orange flavoured candy}) = 0$

(ii) As the bag has lemon flavoured candies, Malini will take out only lemon flavoured candies. Therefore, event that Malini will take out a lemon flavoured candy is a sure event.

Probability Solution Class 1
