Experiential Learning Cecilia Ka Yuk Chan,2022-09-29 Chan s book explores the challenges in assessing experiential learning
deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning
Experiential learning has been studied and proven to be effective for student learning particularly for the development of
holistic competencies i e 21st century skills soft skills transferable skills considered essential for individuals to succeed in the
increasingly global and technology infused 21st century society Universities around the world are now actively organising
experiential learning activities or programmes for students to gain enriching and diversified learning experiences however
the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education
policies and students approach to learning But do educators know how to assess less traditional learning such as service
learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current
assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law
languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do
we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this
book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering
a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical
and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in
experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in
experiential learning for example reflection is often used in assessing students in experiential learning but how reflection
literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed
in detail The volume also introduces a quality assurance programme to recognise student development within experiential
learning programmes The book will be particularly informative to academic developers teachers students and community
partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in
experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular

assessment designs and quality assurance The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
