Trade, the Balance of Payments and Exchange Rate Policy in Developing Countries A. P. Thirlwall, 2003 This book is a synthesis of the author s ideas and research concerning the monetary consequences of trade flows and the relevance of conventional balance of payments adjustment theory These ideas are considered mainly in the context of developing countries many of which suffer from deep structural difficulties and severe foreign exchange shortages Mainstream economic theory regards the balance of payments

to be self adjusting meaning that the impact of the balance of payments on the growth and development process is neither considered nor analysed In contrast the author emphasises the importance of integrating monetary considerations into trade theory and argues that the balance of payments consequences of trade policy need to be carefully addressed This approach has a number of implications for important issues such as the sequencing of trade liberalisation the role of the exchange rate in equilibrating the balance of payments the case for protection and the way in which the importance of export growth is articulated Some of the ideas expressed have a long and distinguished ancestry but they are not part of the mainstream orthodoxy and need airing in a world increasingly divided into rich and poor countries The author also considers the case for a new international economic order which would better serve the needs of developing countries particularly by stabilising primary product prices and controlling speculative capital flows Trade and development economists and policymakers concerned with economic growth and development will appreciate the original and illuminating research in this book

The UN and Global Political Economy John Toye, Richard Toye, 2004-07-09 Against the backdrop of a 20 year revolt against free trade orthodoxy by economists inside the UN and their impact on policy discussions since the 1960s the authors show how the UN both nurtured and inhibited creative and novel intellectual contributions to the trade and development debate Presenting a stirring account of the main UN actors in this debate *The UN and Global Political Economy* focuses on the accomplishments and struggles of UN economists and the role played by such UN agencies as the Department of Economic and Social Affairs the United Nations Commission on Trade and Development and the Economic Commission for Latin America and the Caribbean It also looks closely at the effects of the Latin American debt crisis of the 1980s the growing strength of the World Trade Organization WTO in the 1990s and the lessons to be drawn from these and other recent developments
