*The Realities of Reality - Part IV: The Reality Behind Achieving World Peace* Fritz Dufour, MBA, DÉSS, 2020-04-05 This book is organized in seven chapters Chapter one looks at the origins and the causes of war The chapter argues that war is a consequence of how we as a species have evolved War has both endogenous and exogenous causes While the former depends on our biology and psychology the latter has to do primarily with international relations Chapter two makes the case for the paradoxical nature of war While war takes lives it is legitimate under certain circumstances For example armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means ethical or not Chapter three asks if peace among nations is achievable which is the main theme of this book However it does not elaborate on the question entirely Instead it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony arms race and peacebuilding Chapter four builds on three by looking at realism idealism and pacifism in international relations As to pacifism the chapter attempts to answer the question what was the most peaceful time in history Chapter five presents the elements of hope for world peace by considering the role played by the following 1 the United Nations 2 the North Atlantic Treaty Organization NATO 3 the Organization for Security and Cooperation in Europe OSCE 4 the non governmental organizations NGOs 5 the role of nuclear deterrence 6 globalization 7 transnationalism 8 diplomacy 9 sports 10 international cooperation in space exploration 11 the Nobel Prize and 12 the declining of war and violence in modern times On the other hand chapter six presents the opposite argument or the barriers to world peace using the following points 1 the proliferation of nuclear weapons 2 geoeconomics 3 terrorism 4 the global refugee crisis 5 the profitability of arms sales and 6 the profitability of wars It makes an interesting argument especially as to the profitability of wars by showing how the United States first emerged as an imperial and a world power in the 1890s then as the only world s superpower after World War II Finally chapter seven takes a proactive approach by peering into the future of armed conflict which is likely to take place in new environments Cyberspace the littoral choke points near space and increasingly in expanding cities or slums War The chapter concludes with a discussion on the Doomsday Clock a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man made global catastrophe

*Public Relations Theory II* Carl H. Botan, Vincent Hazleton, 2010-08-27 The public relations landscape has changed dramatically from what it was in 1989 when the original Public Relations Theory volume was published Reflecting the substantial shifts in the intervening years Public Relations Theory II while related to the first volume is more a new work than a revision Editors Carl H Botan and Vincent Hazleton have brought together key theorists and scholars in public relations to articulate the current state of public relations theory chronicling the ongoing evolution of public relations as a field of study The contributors to this volume represent the key figures in the discipline and their chapters articulate the significant advances in public relations theory and

research Working from the position that public relations is a theoretically grounded and research based discipline with the potential to bring numerous areas of applied communication together Botan and Hazleton have developed this volume to open up the public relations field to a broad variety of theories Organized into two major sections Foundations and Tools for Tomorrow the volume presents four types of chapters discussions addressing how public relations should be understood and practiced examinations of theories from other areas applied to public relations explorations of theories about a specific area of public relations practice and considerations of public relations theories and research that have not been given sufficient attention in the past or that hold particular promise for the future of public relations It serves as a thorough overview of the current state of theory in public relations scholarship Like its predecessor Public Relations Theory II will be influential in the future development of public relations theory Taken as a whole the chapters in this book will help readers develop their own sense of direction for public relations theory Public Relations Theory II is an essential addition to the library of every public relations scholar and is appropriate for use in advanced public relations theory coursework as well as for study and reference
