## ***Introduction***

This brief paper provides a general guide to the breadth of what we call 'policy'. Policy is often associated simply with legislation and regulation, but in reality it encompasses a wide variety of activities.

## ***What is Policy?***

A policy often comes in the form of general statements about priorities, written regulations or guidelines, procedures and/or standards to be achieved. At its simplest, policy refers to a distinct path of action which is suitable for the pursuit of desired goals within a particular context, directing the decision making of an organization or individual.

Policy may be formal or informal: a **formal policy** might take the form of a planned policy document that has been discussed, written, reviewed, approved and published by a policymaking body. It could be a government's national plan on HIV/AIDS for example. An **informal policy** might be an ad hoc, general, unwritten but widely recognized practice or understanding within an organization that a course of action is to be followed. Even though this policy may not be made explicit in writing it still exists in practice.

## ***Who Makes Public Policies?***

Policy comes from those who have legitimate authority to impose normative guidelines for action. It is made by elected officials acting in concert with advisors from the higher levels of the administration. Government ministers are the elected officials at the apex of
