Understanding South African Financial Markets Karin Van Wyk, Ziets Botha, I. Goodspeed, 2019. South Africa's financial markets are consistently praised as the most advanced in Africa, while its financial regulatory system, particularly at the stock exchange level, has been judged on more than one occasion to be the best in the world. Regulatory excellence was no doubt an important factor in the unusual resilience displayed by the financial sector during the global financial crisis of 2007-8. However, South African regulatory authorities, not wanting to be complacent, are continuing to follow international good practice initiatives to enhance the resilience and integrity of the financial system. Market practitioners too are striving to keep up to date with financial and technical innovation. Globalisation, increased competition, and the blurring of traditional boundaries between financial institutions and financial products and services. *Understanding South African financial markets* provides a comprehensive overview of the various aspects of South African financial markets and the institutions that operate within them. *Understanding South African financial markets* has been compiled by practitioners from the financial markets and experienced faculty members in economics and financial management. Each chapter starts with study objectives relevant to the material covered. Jargon that may be unfamiliar is explained in lay terms, and both international and local market practices and norms are discussed where relevant. *Understanding South African financial markets* is an introductory text that should serve as a useful reference and guide for commerce students, public servants, and members of the business fraternity alike. Publisher's description.

Banking Regulation in Africa Folashade Adeyemo, 2021-12-28. There is little literature on the development of banking regulation in Nigeria or the scope of powers of the Central Bank of Nigeria, which is its core banking sector regulator. The critical impetus of this book is to contribute to the literature of this area with a detailed exploration of the Nigerian regulatory architecture. In addition, the book also engages in a comparative analysis with two emerging economies in Africa, South Africa and Kenya. It also considers the UK and the US as comparator jurisdictions in light of their regulatory responses to the global financial crisis of 2008. This book contributes to the ongoing discourse in this area by exploring in detail the theoretical underpinnings of regulation and supervision to determine whether there is an understanding of what constitutes effective regulation in these jurisdictions. Given that Nigeria is the core jurisdictional focus

a historical account of banking exchanges from the pre colonial era to more recent times is provided Offering an understanding of how political local and economic settings in conjunction with the theories of regulation have impacted and influenced regulatory development in Nigeria the book engages in an examination of Nigeria s historical experiences with bank failures including the banking crisis it experienced in 2008 The newly enacted Banks and Other Financial Institutions Act 2020 is also explored as part of this discourse Through a critical analysis of the law the book demonstrates that the Nigerian regulator has historically adopted a reactionary strategy instead of a proactive and pragmatic approach which is imperative for an effective regulatory regime The outcome of this analysis is that there are lessons to be learned and proposals are discussed in order to rethink the act of banking regulation
