

JUMO IMAGO 500 Multi-channel Process and Program Controller

Brief description

The JUMO IMAGO 500 is a process and program controller with up to 8 controller channels or 4 program channels. The instrument is built to the format 144 mm x 130 mm for a standard 92mm x 92mm panel cut-out and a mounting depth of 170mm.

The display is a 5" color graphics display (27 colors). The layout of the screen templates can be individually adapted and adjusted. Two freely configurable screen templates make it possible to customize the placing of texts, process values, background pictures and icons.

The controller features up to 8 analog inputs and 6 logic inputs, as well as six expansion slots for switched or analog outputs. Four of these slots can be used alternatively for analog inputs or outputs.

A setup program is available for conveniently configuring the instrument from a PC.

Linearizations for the usual transducers are stored within the controller, four customer-specific linearization tables can be programmed.

A math and logic module can be used to adapt the instrument to a very wide range of control tasks.

Two serial interfaces, RS422/485 or Profibus-DP, serve to integrate the controller into a data network.

Modules can be retrofitted quite simply by the user (see block structure).

The electrical connection is made at the rear of the instrument, via plug-in screw terminals.
