interoperability and covers in depth all of the options available from bridging to porting to platform unification. The costs that this can save you from management maintenance and server consolidation are very significant. YAACOV COHEN, chief executive officer, Mainsoft. A complete and up-to-date coverage of Java EE, NET security interoperability standards and related specifications. HUBERT A. LE VAN GONG, architect, Sun Microsystems, and the coauthor of Web SSO MEX Specification. Evolving Web services standards and technologies offer limited interoperability when it comes to security management and other important application characteristics. Successful interoperability solutions require comprehensive integration strategies that go beyond simple connections. The capability to mitigate security and reliability risks and transactional support is critical to interoperability. Java EE and NET Interoperability addresses issues encountered during the integration process such as a diverse technology set, incompatible APIs, and disparate environment maintenance. The experienced authors outline strategies, approaches, and best practices, including messaging, Web services, and integration-related frameworks and patterns. The book also introduces readers to Service Oriented Architecture (SOA), the building block for scalable and reliable enterprise integration solutions. This indispensable book provides the Java EE and NET developer community with multiple strategies to integrate between Java EE and NET platforms that save developers time and effort. Applying proven interoperability solutions significantly reduces the application development cycle. Coverage includes Effective Java EE/NET integration strategies and best practices, Detailed enterprise coverage as well as standalone Java EE component integration with NET SOA as a building block for Java EE/NET interoperability, Interoperability security issues and risk mitigation, Managing reliability, availability, and scalability for Web services built on Java EE and NET, The latest interoperability standards and specifications including Web SSO MEX and WS Management, Current interoperability technologies such as Windows Communication Foundation, WSE 3.0, JAX-WS, and Enterprise Service Bus.
