

E-Learning Implementation Plan

5 crucial steps to implement the e-Learning technology

Implementing an e-Learning technology in your education infrastructure is a major step. More and more we need to find ways to make the classroom accessible to everyone. The need for online platforms is growing every month. Here's a nifty step-by-step process to implement e-Learning at your institute!

Step 1: Define Your Objectives

- Pure web-based teaching or blended learning
- How to boost recall and retention
- Does your tech infrastructure support it?
- Do your faculty and students show active support?

Step 2: Understand Your Scope

- Automate your assessment
- Old and new tools
- Educational units: Entire courses, seminars, particular lessons
- Online-exams or offline exams

Step 3: Choose the Right Software

- Select the right software to help you share your online courses
- Do you understand the steep learning curve/challenges?
- Will you require mobile support for smartphones and tablets users?

Step 4: Quality Assurance

- Are you able to convey your ideas concisely and clearly?
- Is there any misleading jargon?
- Do the lessons work well on all required devices?
- Does the technology support heavy multimedia content?

Step 5: Marketing Initiatives

- How will learners benefit from it?
- Will you send out newsletters or personal invitations?
- Do you place ads/announcements in front of your target audience?
- Do you stay in contact with your 'alumni' and are responsive to their queries?

Follow this process to implement the e-Learning technology at your institution!

E Learning Course Development Project Plan:

Building Sustainable Information Systems Henry Linger, Julie Fisher, Andrew Barnden, Chris Barry, Michael Lang, Christoph Schneider, 2013-11-08 Information Systems IS as a discipline draws on diverse areas including technology organisational theory management and social science The field is recognized as very broad and encompassing many themes and areas However the development of artefacts or information systems development ISD in the broadest sense is a central concern of the discipline Significantly ISD impacts on the organisational and societal contexts through the use of the artefacts constructed by the development Today that impact also needs to be evaluated in terms of its effects on the environment Sustainable or green IT is a catch all term used to describe the development manufacture management use and disposal of ICT in a way that minimizes damage to the environment As a result the term has many different meanings depending on the role assumed in the life span of the ICT artefact The theme of the proposed work is to critically examine the whole range of issues around ISD from the perspective of sustainability Sustainable IT is an emerging theme in academic research and industry practice in response to an individual concern for the environment and the embryonic regulatory environments being enacted globally to address the environmental impact of ICT In this work we intend to bring together in one volume the diverse research around the development of sustainable IS Perspectives in Business Informatics Research Peter Forbrig, Horst Günther, 2010-09-21 The conference series BIR Business Informatics Research was established 10 years ago in Rostock as an initiative of researchers from Swedish and German universities The objective was to create a global forum where researchers in business informatics seniors as well as juniors could meet collaborate and change ideas Over the years BIR has matured into a series of international conferences typically organized in the Baltic Sea region including Norway and Iceland A steering committee ensures the high quality of the BIR proceedings We are very proud that this year an international and very well known editor has agreed to publish selected papers of the conference The interest in the conference in terms of submissions and participation has steadily increased over the years This year we received 53 contributions among which 14 submissions were accepted as long papers and 4 as short papers A few additional contributions were invited for presentation at the conference The selection was carefully carried out by an International Program Committee The result is a set of interesting and stimulating papers that address important issues such as knowledge management ontologies models work flow specifications data bases and OLAP The conference was opened by an invited technical talk by Dr Klaus Brunnstein from The University of Hamburg who discussed the topic The Information Society on the Way to Web 3.0 Perspectives Opportunities and Risks which is challenging for all of us Training, Developing and Motivating People Richard Barrett, 2003 This series of six core module texts and five new optional unit texts provides comprehensive coverage of Vocational AS and A Level Business Studies Each book focuses on vocational aspects of business rather than theoretical models allowing the reader to understand how businesses operate Developments in Engineering Education
