**Foundations of Data Science** Jeganraja Rajamani, Gopala Krishna Murthy H.R., Ms. M. Sathyapriya, Dr. S. Muthurajan, 2026-02-04 Foundations of Data Science introduces the fundamental concepts tools and techniques used to extract meaningful insights from data The subject covers data collection cleaning exploration visualization probability statistics and basic machine learning methods It emphasizes data driven decision making analytical thinking and the use of programming tools such as Python or R for data analysis The course also introduces data ethics privacy considerations and real world applications across various domains It provides a strong foundation for advanced studies in data analytics artificial intelligence and computational research

**Big Data Analytics in Cognitive Social Media and Literary Texts** Sanjiv Sharma, Valiur Rahaman, G. R. Sinha, 2021-10-10 This book provides a comprehensive overview of the theory and praxis of Big Data Analytics and how these are used to extract cognition related information from social media and literary texts It presents analytics that transcends the borders of discipline specific academic research and focuses on knowledge extraction prediction and decision making in the context of individual social and national development The content is divided into three main sections the first of which discusses various approaches associated with Big Data Analytics while the second addresses the security and privacy of big data in social media and the last focuses on the literary text as the literary data in Big Data Analytics Sharing valuable insights into the etiology behind human cognition and its reflection in social media and literary texts the book benefits all those interested in analytics that can be applied to literature history philosophy linguistics literary theory media communication studies and computational digital humanities

*Proceedings of Fifth International Conference on Computing, Communications, and Cyber-Security* Sudeep Tanwar, Pradeep Kumar Singh, Maria Ganzha, Gregory Epiphaniou, 2024-07-30 This book features selected research papers presented at the Fifth International Conference on

Computing Communications and Cyber Security IC4S 05 organized in India during 29 February to 1 March 2024 The conference was hosted at SMVDU Katra J K India It includes innovative work from researchers leading innovators and professionals in the areas of communication and network technologies advanced computing technologies data analytics and intelligent learning the latest electrical and electronics trends and security and privacy issues The work is presented in two volumes Encyclopedia of Data Science and Machine Learning Wang, John,2023-01-20 Big data and machine learning are driving the Fourth Industrial Revolution With the age of big data upon us we risk drowning in a flood of digital data Big data has now become a critical part of both the business world and daily life as the synthesis and synergy of machine learning and big data has enormous potential Big data and machine learning are projected to not only maximize citizen wealth but also promote societal health As big data continues to evolve and the demand for professionals in the field increases access to the most current information about the concepts issues trends and technologies in this interdisciplinary area is needed The Encyclopedia of Data Science and Machine Learning examines current state of the art research in the areas of data science machine learning data mining and more It provides an international forum for experts within these fields to advance the knowledge and practice in all facets of big data and machine learning emphasizing emerging theories principals models processes and applications to inspire and circulate innovative findings into research business and communities Covering topics such as benefit management recommendation system analysis and global software development this expansive reference provides a dynamic resource for data scientists data analysts computer scientists technical managers corporate executives students and educators of higher education government officials researchers and academicians **Intelligent Computing** Kohei Arai,Supriya Kapoor,Rahul Bhatia,2020-07-03 This book focuses on the core areas of computing and their applications in the real world Presenting papers from the Computing Conference 2020 covers a diverse range of research areas describing various detailed techniques that have been developed and implemented The Computing Conference 2020 which provided a venue for academic and industry practitioners to share new ideas and development experiences attracted a total of 514 submissions from pioneering academic researchers scientists industrial engineers and students from around the globe Following a double blind peer review process 160 papers including 15 poster papers were selected to be included in these proceedings Featuring state of the art intelligent methods and techniques for solving real world problems the book is a valuable resource and will inspire further research and technological improvements in this important area **Intelligent Systems and Applications** Kohei Arai,Supriya Kapoor,Rahul Bhatia,2020-08-25 The book Intelligent Systems and Applications Proceedings of the 2020 Intelligent Systems Conference is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world The Conference attracted a total of 545 submissions from many academic pioneering researchers scientists industrial engineers students from all around the world These submissions underwent a double blind peer review process Of those 545

submissions 177 submissions have been selected to be included in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have enabled a larger number of problems to be tackled more effectively This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue to report on up to the minute innovations and developments This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope We hope that readers find the volume interesting and valuable it provides the state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research
