Oversight of the Cybersecurity Act of 2015 Cybersecurity, Infrastructure Protection, and Security Technologies of the Committee on Homeland Security House of Representatives, Infrastructure Protection Subcommittee,Subcommittee on Cybersecurity,2017-05-25

The Cybersecurity Information Sharing Act of 2015 CISA encourages private companies to voluntarily share information about cyber threats with each other and the Government CISA broadly authorizes the Federal Government to share Unclassified cyber threat indicators CTI and defensive measures DM technical data that indicates how networks have been attacked and how such attacks have been successfully detected prevented or mitigated The law accounts for its impacts on privacy and civil liberties by requiring that companies scrub personal information before sharing cyber threats CISA also addresses the risks of misuse by the Federal Government or the private sector by only extending liability protections for companies and entities who participate in cybersecurity information sharing if that information sharing is done in accordance with CISA requirements CISA is not a silver bullet solution to cybersecurity challenges but increasing the speed and quality of bilateral information flows of CTIs and DMs is essential for developing a holistic approach to cyber defense
