Centre International de Formation Européenne Nice CIFE European Online Academy course European Law Informational Self  
Determination in Cloud Computing Data Transmission and Privacy with Subcontractors language English abstract The paper  
analyses the constraints of the current European directive on data protection regarding the free and active exercise of the  
right to informational self-determination in cloud computing with subcontractor chains The analysis focuses in particular on  
the personal and geographical scope of the protection of personal data on the legitimation of data processing under the  
aspect of data transmission into secure and unsecure third countries with subcontractor involvement Herein it will be  
critically analysed whether the options under which it is possible to process personal data will deliver sufficient privacy  
security in cloud computing Furthermore the paper examines the effectiveness and the consequences of possible legitimation  
of processing personal data in cloud computing Also will be regarded the legitimation options to include subcontractors in  
complex cloud computing landscapes in secure and unsecure third countries The data subject and the cloud user position and  
chances to execute their rights of informational self-determination in distributed cloud computing landscapes will be critical  
looked at Based on the multiple challenges that the personal data faces in complex cloud computing landscapes various  
improvement potentials addressed to different actors emphasize the necessity to reduce the risk to the data subject's  
informational self-determination in cloud computing Finally the recent regulation on general data protection that was  
published by the Council on 11th June 2015 will be cross-checked against the identified gaps of the currently existing data  
protection directive with an emphasis on the requirements to achieve informational self-determination
