Eterno,Arvind Verma,Eli B. Silverman,2022-09-30 This edited collection illuminates the weaknesses and strengths of crime reporting across a wide range of countries with a focus on democratic countries in which the police bear some accountability to citizens In one compendium for the first time this book documents how different countries record or fail to record crimes With chapters written by native authors who are experts on the practices of their respective countries the book explores practices in 15 different countries across the globe Organized with a parallel country by country approach the book describes and analyzes methods police use to record crimes with the awareness that the counting of crimes is not only an issue of empirical measurement but also one of social construction Crime reporting practices vary widely by country In some cases reports are not taken and in others reports are carefully based on preliminary investigations Willful manipulation of crime reports can and does occur and the book explores related factors such as political pressure personal ambition community safety and more Discussion questions at the end of each chapter help the reader evaluate the significant issues influencing each country The editors conclude by suggesting best practices for crime reporting and the collection of crime data A unique addition to this book is a foreword by Tofiq Murshudlu the Head of Drugs and Crime for the United Nations in Vienna The book is intended for a wide range of audiences including policing scholars law enforcement and

community leaders and students of criminal justice **World Christian Trends Ad30-ad2200 (hb)** ,2001 Global Trends in Wildlife Management International Union of Game Biologists. Congress,1992 *The Associational Counter-Revolution: The Spread of Restrictive Civil Society Laws in the World's Strongest Democratic States* Chrystie F. Swiney,2022-06-07 In an increasing number of countries around the globe representing all regime types in all regions with all levels of economic and military strength civil society s autonomy from the state its defining feature is diminishing While a variety of tools are used to restrict civil society organizations CSOs independence from the state an increasingly popular and dangerously effective vehicle for accomplishing this goal is the law Through the passage of legislation that imposes new restrictions on the ability of CSOs to operate free from excessive government scrutiny and control governmental actors are gaining greater control over the non governmental sector and in ways that benefit from the veneer of legality Perplexingly such laws are not only appearing in countries where they might be expected Azerbaijan Burundi China Egypt Ethiopia Russia Zimbabwe and countries throughout the Middle East Indeed they are increasingly appearing in democratic states too including strong fully consolidated democratic states with historically strong and independent civil society sectors Canada India New Zealand Spain Israel Hungary Poland and the US to name just a few Restrictive CSO laws which are unsurprising in authoritarian leaning states are uniquely puzzling in the context of democratic ones which have been the primary defenders funders and champions of a robust and independent civil society This book explores this concerning and intriguing phenomenon by documenting its full scope and spread within the world s strongest democratic states and attempting to explain its occurrence Using a combination of mixed methods theory process tracing interviews and statistical analysis this timely analysis helps to shed light on a global phenomenon that seems to be fueling the democratic backsliding visible in an increasing number of democracies throughout the world This exploration which bridges comparative and international law international relations democratic theory and state civil society relations attempts to make sense of this global contagion the closing space phenomenon which threatens to undermine one of cornerstones of any democracy a free and independent civil society in the years and decades ahead **Global Trends in Textile Technology and Trade** Roy Pepper,1991 **When Languages Die : The Extinction of the World's Languages and the Erosion of Human Knowledge** K. David Harrison Assistant Professor of Linguistics Swarthmore College,2007-02-01 It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison s book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language s structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He

uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison s book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers
