**Risk Management Practices in Construction** Ayodeji E. Oke, Pelumi E. Adetoro, Seyi S. Stephen, Clinton O. Aigbavboa, Lukman O. Oyewobi, Douglas O. Aghimien, 2023-07-26 This volume describes risk management practices in the construction industry in selected countries with an emphasis on developing countries and how these countries can learn from the practices in more developed ones Risk management in the construction industry can be difficult to understand due to the various complex procedures that are involved and to the unique concerns and contexts associated with each project The industry has been a key contributor to the economic and social development of many countries of the world and is increasingly incorporating sustainability into its practices However it is plagued by various risks that can affect the quality cost time and overall sustainability of projects Therefore there is need to effectively manage risk in order to ensure timely completion of construction projects in good quality and within budget which in turn results in more efficient and often more sustainable practices The book is divided into four parts The first section features a primer on risk management practices as they pertain to the construction industry The second part dives in to describe risk management in selected developing countries including Malaysia Qatar Saudi Arabia South Africa Sri Lanka and Tanzania as well as the city of Hong Kong The third section describes the construction risk management practices of a selection of more developed countries with known risk management institutes and established practices of risk management These countries include Australia Canada Sweden and United States of America The fourth part offers a general overview of the definition concepts and process of risk management based on reviewed literature It also discusses the benefits of effective risk management to clients and to project teams especially from the perspective of ensuring sustainability This last section also summarizes the risk management practices in both developing and developed countries for the purpose of improving the practices in the former by learning from the latter

Construction Digitalisation Douglas Aghimien, Clinton Aigbavboa, Ayodeji Oke, Wellington Thwala, 2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a

traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries
