students are the largest international student group in UK universities today yet little is known about their undergraduate  
writing and the challenges they face Drawing on the British Academic Written English corpus a large corpus of proficient  
undergraduate student writing collected in the UK in the early 2000s this study explores Chinese students written  
assignments in English in a range of university disciplines contrasting these with assignments from British students The  
study is supplemented by questionnaire and interview datasets with discipline lecturers writing tutors and students and  
provides a comprehensive picture of the Chinese student writer today Theoretically framed through work within academic  
literacies and lexical priming the author seeks to explore what we know about Chinese students writing and to extend these

findings to undergraduate writing more generally In a globalized educational environment it is important for educators to understand differences in writing styles across the student body and to move from the widespread deficit model of student writing towards a descriptive model which embraces different ways of achieving success Chinese Students Writing in English will be of value to researchers EAP tutors and university lecturers teaching Chinese students in the UK China and other English or Chinese speaking countries *English Mechanic and World of Science* ,1875 **English Language Cookbooks, 1600-1973** Lavonne B.
