and indeed a good one. The book is truly a user's book, one of the useful ones. After this first feeling of self-confidence, I just kept on reading the book and found very thorough and illuminative reviews of no less than 24 computer programs for qualitative analysis. Renata Tesch initiated the work of making it easier for us to survey the qualitative analysis methods. Weitzman and Miles carry on in the finest way. Nyhedsbrer. Although the authors have a background in social and organizational psychology, their expertise on qualitative research methods is relevant to gerontologists. The authors give a history of the use of computers in qualitative data analysis, describe the different types of programs, and suggest future directions, but the bulk of this book is reviews of the software out there. Before you spend several hundred dollars on a software program, spend thirty and get this book. T. L. Brink in *Clinical Gerontologist*. Eben A. Weitzman and Matthew B. Miles's valuable sourcebook on computer programs is designed exclusively for those interested in qualitative data analysis. For qualitative researchers who want to learn or update their knowledge of the use of computer software. Choice: What program do I use to analyze my field notes? Eben A. Weitzman and Matthew B. Miles provide the information you need to make that decision intelligently: full descriptions, informed judgments, and helpful comparisons. Anyone who does fieldwork needs this book. Howard Becker, Department of Sociology, University of Washington, Seattle. This will be the standard work of reference for several years to come. We owe the authors a considerable debt of gratitude for all the work they have put into reviewing such a comprehensive range of software. The result is incredibly lucid. Paul Atkinson, University of Wales, Cardiff. The book is absolutely perfect for my situation. I don't know how many readers will be in the position of purchasing software for respective labs, but those who are will be in for a real treat. The comprehensiveness of the reviews is more than adequate to determine whether a particular program meets the needs of an individual or group. It is the most comprehensive book of its kind for any kind of software that I have ever seen. Steven E. Wolfel, Research Publishing Consultant. Making decisions about choosing software for qualitative data analysis can be intimidating, and I think this book will be an excellent resource for those of us who are involved in this type of research. I found this to be an extremely well thought out and informative resource book. The detail is wonderful. Kathleen R. Gilbert, Indiana University, Bloomington. Do you want to start, extend, or update your use of computer software for qualitative data analysis? If so, this clear and user-friendly guidebook is for you. Without assuming its reader has extensive computer experience, *Computer Programs for Qualitative Data Analysis* takes a critical yet practical look at the wide range of software currently available. It gives detailed reviews of 24 programs in five major categories: text retrievers, textbase managers, code and retrieve programs, code-based theory builders, and conceptual network builders, and gives ratings of more than 75 features per program. The authors also provide detailed guidance in operating each program. They help you to ask key questions about your computer use, the nature of your project, time line analyses, planned, and the worksheets required to help you identify the programs best suited to your needs. Up to date and practical. *Computer Programs for Qualitative Data Analysis* is an absolute must-have book for any qualitative researcher who

uses or wants to use computer programs in analyses
