The Conservative Futurist James Pethokoukis, 2023-10-03 Discover the surprising case for how conservatism can help us achieve the epic sci fi future we were promised America was once the world's dream factory We turned imagination into reality from curing polio to landing on the Moon to creating the internet And we were confident that more wonders lay just over the horizon clean and infinite energy a cure for cancer computers and robots as humanity's great helpers and space colonies Also of course flying cars Science fiction from The Jetsons to Star Trek would become fact But as we moved into the late 20th century we grew cautious even cynical about what the future held and our ability to shape it Too many of us saw only the threats from rapid change The year 2023 marks the 50th anniversary of the start of the Great Downshift in technological progress and economic growth followed by decades of economic stagnation downsized dreams and a popular culture fixated on catastrophe AI that will take all our jobs if it doesn't kill us first nuclear war climate chaos plague and the zombie apocalypse We are now at risk of another half century of making the same mistakes and pushing a pro progress future into the realm of impossibility But American Enterprise Institute AEI economic policy expert and long time CNBC contributor James Pethokoukis argues that there's still hope We can absolutely turn things around if we the people choose to dream and act How dare we delay or fail to deliver for ourselves and our children With groundbreaking ideas and sharp analysis Pethokoukis provides a detailed roadmap to a fantastic future filled with incredible progress and prosperity that is both optimistic and realistic Through an exploration of culture economics and history *The Conservative Futurist* tells the fascinating story of what went wrong in the past and what we need to do today to finally get it right Using the latest economic research and policy analysis as well as insights from top economists historians and technologists Pethokoukis reveals that the failed futuristic visions of the past were totally possible And they still are If America is to fully recover from the COVID 19 pandemic take full advantage of emerging tech from generative AI to CRISPR to reusable rockets and launch itself into a shining tomorrow it must again become a fully risk taking future oriented society It's time for America to embrace the future confidently act boldly and take that giant leap forward

King Dollar Paul Blustein, 2025-03-18 An award winning economic journalist on why the US dollar is positioned to maintain global primacy and what that means for America and the world Prophecies that the dollar will lose its status as

the world's dominant currency have echoed for decades and are increasing in volume. Cryptocurrency enthusiasts claim that Bitcoin or other blockchain-based monetary units will replace the dollar. Foreign policy hawks warn that China's renminbi poses a lethal threat to the greenback. And sound money zealots predict that mounting US debt and inflation will surely erode the dollar's value to the point of irrelevancy. Contra the doomsayers, Paul Blustein shows that the dollar's standing atop the world's currency pyramid is impregnable, barring catastrophic policy missteps by the US government. Recounting how the United States has wielded the dollar to impose devastating sanctions against adversaries, Blustein explains that although targets such as Russia have found ways to limit the damage, Washington's financial weaponry will retain potency long into the future. His message, however, is that America must not be complacent about the dollar, the great power that its supremacy confers comes with commensurate responsibility.

Transformed States Martin Halliwell, 2024-11-15 *Transformed States* offers a timely history of the politics, ethics, medical applications, and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID-19 pandemic. In exploring the entanglements of mental and physical health in an age of biotechnology, it views the post-Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty-first century. The book draws on original research spanning the presidencies of George H. W. Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology. Some of these technologies reveal fierce ideological conflicts in the arenas of cloning, reproduction, artificial intelligence, longevity, gender affirmation, vaccination, and environmental health. Interweaving politics and culture, the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts from *Oryx and Crake* to *Annihilation* and from *Gattaca* to *Avatar*. By assessing the complex relationship between federal politics and the biomedical industry, *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.
