representations of the infrastructural system and that these representations stem from the different stakeholders interests which drive their efforts to make the system legible The Trash Track project in Seattle used sensor technology to map discarded items through the waste and recycling systems the Forager project looked at the informal organization processes of waste pickers working for Brazilian recycling cooperatives and mobile systems designed by the city of Boston allowed residents to report such infrastructure failures as potholes and garbage spills Through these case studies Offenhuber outlines an emerging paradigm of infrastructure governance based on a complex negotiation among users technology and the city **Mike Meyers' CompTIA Network+ Guide to Managing and Troubleshooting Networks Lab Manual, Fifth Edition (Exam N10-007)** Mike Meyers,Jonathan S.
