

Software Engineering Exam Questions With Correct Answers

Software Engineering - answer✓Multi-person construction of multi-person software.

System - answer✓Purposeful collection of interrelated components working together to achieve a common goal.

Requirements Engineering - answer✓The process of eliciting: The services that the customer requires from a system. The constraints under which it operates and is developed.

Requirements - answer✓Descriptions of the system services and constraints that are generated during the requirement engineering process.

User Requirements - answer✓Statements in natural language and diagrams of the system services and operational constraints. Written for customers, so it must use their language and mental model. Understandable for users who don't have detailed technical knowledge. UML is your friend.

System Requirements - answer✓A structured document setting out detailed descriptions of the system's functions, services, and operational constraints. Defines what should be implemented. Must be concise in their technical effects.

Functional Requirements - answer✓Statements of services the system should provide. How the system should react to particular inputs. How the system should behave in particular situation.

Examples of Functional Requirements - answer✓"A library system that provides a single interface to a number of databases of articles in different libraries". "Users can search for and download this articles for personal study". "Users shall be able to search either all of the initial set of databases or select a subset from it". "The system shall provide appropriate viewers for the users to read documents in the document store".

Non-Functional Requirements - answer✓These define system properties and constraints.

Properties: reliability, response time, storage requirements.
