The Renaissance A Short History Modern Library Chronicles:

The Renaissance Paul Johnson, 2007-12-18 The Renaissance holds an undying place in the human imagination and its great heroes remain our own from Michelangelo and Leonardo to Dante and Montaigne This period of profound evolution in European thought is credited with transforming the West from medieval to modern reviving the city as the center of human activity and the acme of civilization and of course producing the most astonishing outpouring of artistic creation the world has ever known Perhaps no era in history was more revolutionary and none has been more romanticized What was it In The Renaissance the great historian Paul Johnson tackles that question with the towering erudition and imaginative fire that are his trademarks Johnson begins by painting the economic technological and social developments that give the period its background But as Johnson explains The Renaissance was primarily a human event propelled forward by a number of individuals of outstanding talent in some cases amounting to genius It is the human foreground that absorbs most of the book's attention We can give all kinds of satisfying explanations of why and when the Renaissance occurred and how it transmitted itself Johnson writes But there is no explaining Dante no explaining Chaucer Genius suddenly comes to life and speaks out of a vacuum Then it is silent equally mysteriously The trends continue and intensify but genius is lacking In the four parts that make up the heart of the book The Renaissance in Literature and Scholarship The Anatomy of Renaissance Sculpture The Buildings of the Renaissance and The Apostolic Successions of Renaissance Painting Johnson chronicles the lives and works of the age's animating spirits Finally he examines the spread and decline of the Renaissance and its abiding legacy A book of dazzling riches The Renaissance is a compact masterpiece of the historian's art

The Renaissance Paul Johnson, 2013-10-31 A fresh and vigorous appreciation of the intellectual liberation and artistic triumphs of the Italian Renaissance The development of the first universities from the 12th century onwards growing wealth and patronage in certain cities and above all the invention of printing and cheap paper provided essential conditions for the Renaissance And it was in literature and scholarship that it began in the rebirth of classical culture that loosened the Church's iron grip on visual art Paul Johnson tells the story in turn of Renaissance literature sculpture building and painting Despite the critical importance of inventions outside Italy printing in Germany and oil painting in Holland he locates the Renaissance firmly in Italy and in Florence above all between 1400 and 1560 There are memorable sketches of the key figures the frugal and shockingly original Donatello the awesome Michelangelo the delicacy of Giovanni Bellini The final part of the book charts the spread and decline of the Renaissance as the Catholic Church repositioned itself to counter the Reformation which the Renaissance had itself helped to produce

Reformation** Michael J. Sauter,2019-01-11 In *The Spatial Reformation* Michael J Sauter offers a sweeping history of the way
Europeans conceived of three dimensional space including the relationship between Earth and the heavens between 1350
and 1850 He argues that this spatial reformation provoked a reorganization of knowledge in the West that was arguably as
important as the religious Reformation Notably it had its own sacred text which proved as central and was as ubiquitously
embraced Euclid s Elements Aside from the Bible no other work was so frequently reproduced in the early modern era
According to Sauter its penetration and suffusion throughout European thought and experience call for a deliberate
reconsideration not only of what constitutes the intellectual foundation of the early modern era but also of its temporal range
The Spatial Reformation contends that space is a human construct that is it is a concept that arises from the human
imagination and gets expressed physically in texts and material objects Sauter begins his examination by demonstrating how
Euclidean geometry when it was applied fully to the cosmos estranged God from man enabling the breakthrough to
heliocentrism and by extension the discovery of the New World Subsequent chapters provide detailed analyses of the
construction of celestial and terrestrial globes Albrecht D rer s engraving Melencolia the secularization of the natural history
of the earth and man and Hobbes s rejection of Euclid s sense of space and its effect on his political theory Sauter s
exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference
to spaces and places that human eyes had not actually seen The Spatial Reformation illustrates how these disparate
advancements can be viewed as resulting expressly from early modernity s embrace of Euclidean geometry International
