include the basics of psychotherapy from how to respond to a patient's initial call to termination of care. Selected approaches: interpersonal, cognitive behavioral, and psychodynamic psychotherapy are highlighted with discussion of evidence-based research. Specific techniques for working with commonly seen patient populations that require special consideration: those who have experienced trauma, children, and older adults are included. In addition, how to integrate psychopharmacology and psychotherapy is discussed in detail. A straightforward approach to psychotherapy using a holistic nursing framework. Latest findings on the neurophysiology of psychotherapy including research on attachment, therapeutic relationships, and trauma. Evidence-based research for all approaches and populations discussed. Provides treatment hierarchy for decision making in selecting strategies for treatment from the initial contact and assessment to termination. Step-by-step guide to building the nurse-patient relationship in order to achieve quality outcomes. Includes detailed instructions on therapeutic communication techniques. Detailed instructions teach you how to use the latest therapeutic communication techniques. Includes all patient populations from children to the older adult with special emphasis on working with traumatized patients. Comprehensive appendices provide quick access to helpful forms and diagnostic tools specific to psychotherapy nursing practice.

Handbook of Assessment in Mindfulness Research Oleg N. Medvedev, Christian U. Krägeloh, Richard J.

Siegert, Nirbhay N. Singh, 2025-08-03 This handbook provides comprehensive coverage of assessment instruments used in mindfulness research. It discusses traditional and modern approaches used to develop psychometric measures and to establish their reliability and validity such as classical test theory, item response theory, and Rasch model, generalizability theory, facet benchmarking, and network analysis. The handbook provides information on conceptual foundations, development, and psychometric properties of assessment instruments used to measure mindfulness in children, adolescents, and adults. In addition, it provides similar information on scales used in specific contexts and for various purposes. It reviews behavioral, cognitive, and psychophysiological assessment measures of mindfulness. The handbook examines a broad range of psychological, physical health, and mental health and related measures that are used in mindfulness research. This reference work enables researchers to choose appropriate measurement tools for a broad range of mindfulness research. Key areas of coverage include: Nature and theoretical foundations of assessment; Origins and definitions of mindfulness; Mindfulness scales for children and adolescents; Mindfulness scales for adults; Mindfulness scales for specific contexts and purposes; Mindfulness and Buddhist-related scales; Behavioral assessments of mindfulness; Cognitive and psychophysiological assessments of mindfulness. The Handbook of Assessment in Mindfulness Research is an essential reference for researchers, professors, and graduate students as well as clinicians, therapists, and other mental health practitioners in clinical psychology and affiliated medical and mental health disciplines including complementary and alternative medicine, social work, occupational, and rehabilitation therapy.
