Geddes, Joseph R. Lakowicz, 2012-12-06 The Who's Who in Fluorescence 2003 volume was published in November 2002 It featured some 312 personal entries from fluorescence workers all over the world Initially we were unsure how useful the volume would be However it wasn't very long before we were inundated with requests for both bulk and personal orders In addition a significant number of copies were freely distributed at conference venues such as at the Biophysical Society meeting in San Antonio Texas March 2003 and at the Methods and Applications of Fluorescence Spectroscopy conference MAFS in Prague Czech Republic August 2003 where these two venues probably host the largest gathering of Fluorescence workers anywhere Even when we were initially taking e-mail based submissions contributors were freely commenting on what a useful resource they saw the volume as being We subsequently shared these comments on the back outside cover of the 2003 volume As well as individual scientists supporting the 2003 volume the Fluorescence based Companies also played a key role where without their financial support the volume probably would not have the impact it currently has As such the Who's Who in Fluorescence 2003 has been a much bigger success than we ever envisaged Subsequently we now present the Who's Who in Fluorescence 2004 volume The new volume features 359 personal entries from 35 countries around the world In addition we have increased company support which should enable us to distribute more copies at targeted venues in 2004 *Annual Report to the President* Cornell University. Geddes,2009-04-02 th The Who s Who in Fluorescence 2009 is the 7 volume of the Who s who series The previous six volumes 2003 2008 have been very well received by the fluorescence community with 1000 s of copies being distributed around the world through conferences and workshops as well as through internet book sites In addition the Institute of Fluorescence <http://theinstituteoffluorescence.com> mailed 100 s of copies of the 2008 volume to contributors around the world This new 2009 volume features some 419 entries from no fewer than 41 countries worldwide as compared to 418 entries 38 different countries in 2008 and 405 entries in the 2007 volume respectively We have received 29 new entries this year and deleted 25 entries that were not updated by contributors from past years In 2008 129 AIM numbers were submitted as compared to 106 in 2007 This year the number has risen again to 136 AIM numbers submitted This year we also see the introduction of the h index number listing a publication statistic provided by the Thompson s ISI Web of Science Some 42 contributors provided their h numbers In 2009 we also see a continued and strong company support in light of the current world economic climate which will enable us to further disseminate the volume in 2009 2010 In this regard we especially thank the instrumentation companies for their continued support where without their financial contributions it is likely that the volume would not be the success it is today *Design of a Single Pixel Circuit for Digital Electrochemical Camera* Hui Chen,2002 **Conceptual Design of an Electrochemical Camera** Yabin Wang,2002 **Research Centers Directory: Descriptive listings** ,2002 *Who's who in Fluorescence* ,2003 Membership Directory National Academy of Sciences (U.S.),2002 **Directory of Graduate Research** ,2001 Faculties publications and doctoral theses in departments or divisions of chemistry chemical engineering biochemistry and pharmaceutical and or medicinal chemistry at universities in the United States and Canada *Physics Briefs* ,1994 Journal of Combinatorics, Information & System Sciences ,1996 A Guide to Engineering Placement Cornell University.
