Environmental Sustainability and American Public Administration J. Michael Martinez, 2016-11-01. Protecting the natural environment and promoting environmental sustainability have become important objectives for U.S. policymakers and public administrators at the dawn of the twenty-first century. Institutions of American government, especially at the federal level, and the public administrators who work inside of those institutions play a crucial role in developing and implementing environmental sustainability policies. This book explores these salient issues logically. First, it explores fundamental concepts such as what it means to be environmentally sustainable, how economic issues affect environmental policy, and the philosophical schools of thought about what policies ought to be considered sustainable. From there, it focuses on processes and institutions affecting public administration and its role in the policy process. Accordingly, it summarizes the rise of the administrative state in the United States and then reviews the development of federal environmental laws and policies with an emphasis on late twentieth-century developments. This book also discusses the evolution of American environmentalism by outlining the history of the environmental movement and the growth of the environmental lobby. Finally, this book synthesizes the information to discuss how public administration can promote environmental sustainability.

Contemporary Issues in Construction in Developing Countries George Ofori, 2012-06-26. Economic growth and socio-economic development are particularly important for developing countries, and the construction industry plays a central role in driving both of these. Traditionally, the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context. In addition, research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or

their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to *New Perspectives on Construction in Developing Countries* which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues

Encouraging Ethics and Challenging Corruption Noel Preston, Charles J. G. Sampford, Carmel Connors, 2002 *Encouraging Ethics and Preventing Corruption* brings theory and practice together in addressing the question How are we to be ethical in public life and through public institutions It is a major contribution to public sector ethics within Australia and internationally because it provides an exhaustive analysis of reform across a decade in one jurisdiction Queensland and then proceeds to itemise a best practice integrity system or ethics regime Drawing on the extensive research of two of Australia's leading practical ethicists this text is essential reading for all students and

practitioners of applied and professional ethics in the public sphere Part A of the text provides a preferred theoretical and conceptual framework which both justifies and guides the development of a public sector ethics regime Part B examines the place of the individual within a world of institutional ethics Part C outlines the Queensland governance reforms introduced since 1989 following the Fitzgerald Inquiry which exposed corruption in the police and ministry The final chapter the Epilogue gathers the insights of earlier chapters and suggests a more explicitly ethics centred approach to governance reform that may take us beyond best practice Clearly while it is the Australian context we have in mind we are confident that this is a text which addresses the quest for integrity and ethics in government wherever society is committed to social and liberal democratic ideals
