AI Usage Manual Framework:

A Reference Manual for Data Privacy Laws and Cyber Frameworks Ravindra Das,2024-10-29 As the world is becoming more digital and entwined together the cybersecurity threat landscape has no doubt become a daunting one For example typical threat variants of the past especially those of phishing have now become much more sophisticated and covert in nature A lot of this has been brought on by the proliferation of ransomware which exploded during the COVID 19 pandemic Now there is another concern that is looming on the horizon data privacy Now more than ever consumers on a global basis want to know exactly what is happening to their personal identifiable information PII datasets Examples of what they want to know about include the following What kinds and types of information and data are being collected about them How those PII datasets are being stored processed and transacted with How their PII datasets are being used by third party suppliers In response to these concerns and fears as well as the cyber risks posed by these datasets many nations around the world have set up rather extensive and very detailed data privacy laws In their respective tenets and provisions these pieces of legislation not only specify why and how businesses need to comply with them but also outline the rights that are afforded to each and every consumer In this book we detail the tenets and provisions of three key data privacy laws The GDPR The CCPA The CMMC We also provide a general framework at the end on how a business can comply with these various data privacy laws The book begins with an in depth overview of the importance of data and datasets and how they are so relevant to the data privacy laws just mentioned

Artificial Intelligence for Business Analytics Felix Weber,2023-03-01 While methods of artificial intelligence AI were until a few years ago exclusively a topic of scientific discussions today they are increasingly finding their way into products of everyday life At the same time the amount of data produced and available is growing due to increasing digitalization the integration of digital measurement and control systems and automatic exchange between devices Internet of Things In the future the use of business intelligence BI and a look into the past will no longer be sufficient for most companies Instead business analytics i e predictive and predictive analyses and automated decisions will be needed to stay competitive in the future The use of growing amounts of data is a significant challenge and one of the most important areas of data analysis is represented by artificial intelligence methods This book provides a concise introduction to the essential aspects of using artificial intelligence methods for business analytics presents machine learning and the most important algorithms in a comprehensible form using the business analytics technology framework and shows application scenarios from various industries In addition it provides the Business Analytics Model for Artificial Intelligence a reference procedure model for structuring BA and AI projects in the company This book is a translation of the original German 1st edition K nstliche Intelligenz f r Business Analytics by Felix Weber published by Springer Fachmedien Wiesbaden GmbH part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically

differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors

Artificial Intelligence in Real-Time Control M. G. Rodd,G. J. Suski,2014-05-23 Artificial Intelligence in Real Time Control documents the proceedings of the IFAC Workshop held in Clyne Castle Swansea UK 21 23 September 1988 It includes two keynote addresses that discussed architectural issues for expert systems in real time control the problem of representing knowledge and reasoning and the problems encountered in obtaining such information Other papers contained in these proceedings are representative of the major research bodies active throughout the world in the application of AI techniques in real time control although it was inevitable that a Europe based conference would highlight the work of the European groups While AI is clearly still in the process of establishing itself it is undoubtedly a major new area of engineering endeavor Practical experience is still relatively limited and many of the results discussed at this event were obtained through simulation or in a few cases from reduced practical experience The importance though lies in the fact that many countries are pouring extensive resources into the attempt to control difficult processes by using AI techniques The wide cross section of interest was demonstrated by the fact that many diverse industries were represented at the workshop ranging from power systems control to telecommunications and into the steel industry

Artificial Intelligence Risk Management Kurt J. Engemann,2025-12-01 AI demonstrates the potential to impact virtually every aspect of modern life making it one of the most transformative technologies of our time AI has a wide range of applications across various sectors and as AI continues to evolve its integration into various activities is expected to deepen further changing how we work live and interact with the world around us AI systems from simple machine learning models to advanced autonomous
