significantly expanded edition of *Essential Criminology* covers the broadest range of criminological theories the essential
criminological theories from longstanding ones such as classical theory and strain theory to recently introduced ones such as
ultra realism and green cultural criminology Whether all are essential depends on one's theoretical stance The value of this
text is its carefully designed comparative analysis which helps readers consider their relative contribution to the field
Originally designed as an alternative to lengthy and expensive introductory texts *Essential Criminology* provides a concise
yet comprehensive overview of the field The book offers a clear structured student friendly critical analytical examination of
the nature of crime theories of crime causation and their criminal justice policy implications Causal theories covered range
from micro level classical and rational choice to biological psychological social learning social control and interactionist
perspectives to macro level social ecology anomie strain conflict Marxist feminist and postmodernist theories Over its 26 year
history the book has added new theoretical perspectives as these have gained prominence New to this edition are chapters
on critical and ultra realism and critical green criminology and discussions of zemiology critical race theory and quantum
holographic criminology The authors have also expanded some theoretical frameworks that had previously been
underdeveloped such as opportunity theory subcultural theory and social constructionism *Essential Criminology*
contextualizes criminology in the globally interdependent 21st century addressing the crimes of terrorism global pandemics
and climate change With its cutting edge updates illustrative real world examples and student friendly study tools including
analytically comparable summary charts exposing each theory's ontological assumptions this text was designed primarily for
