Blockchain Revolution Technology Changing Business:

Blockchain Revolution Don Tapscott, Alex Tapscott, 2016-05-10 The first book to explain why blockchain technology will fundamentally change the Internet what it does and how we use it Over the past 30 years no theorist of the digital age has better explained the next big thing than Don Tapscott For example in *Wikinomics* Tapscott was the first to show how the Internet provides the first global platform for mass collaboration Now he writes about a profound technological shift that will change how the world does business and everything else using blockchain technology which powers the digital currency Bitcoin The Internet as we know it is great for collaboration and communication but is deeply flawed when it comes to commerce and privacy The new blockchain technology facilitates peer to peer transactions without any intermediary such as a bank or governing body Keeping the user's information anonymous the blockchain validates and keeps a permanent public record of all transactions That means that your personal information is private and secure while all activity is transparent and incorruptible reconciled by mass collaboration and stored in code on a digital ledger With its advent we will not need to trust one another in the traditional sense because trust is built into the system itself Although many opportunities for the blockchain require a digital currency Bitcoin is only one application of this great innovation in computer science The blockchain can hold any legal document from deeds and marriage licences to educational degrees and birth certificates Call it the World Wide Ledger It enables smart contracts decentralized autonomous organizations decentralized government services and transactions among things The Internet of Everything needs a Ledger of Everything the blockchain is a truly open distributed global platform that fundamentally changes what we can do online how we do it and who can participate Tapscott writing with his son Alex a financial analyst and technologist argues that the blockchain will shape the next era of prosperity in finance business healthcare education governance and beyond

Blockchain Revolution Don Tapscott, Alex Tapscott, 2018-06-12 The first foundational book on blockchain technology from the bestselling author of *Wikinomics* Don Tapscott and blockchain expert Alex Tapscott now in paperback with a new preface and chapter explaining recent developments in the world of blockchain including cryptoassets ICOs smart contracts and more This book has had an enormous impact on the evolution of blockchain in the world Satya Nadella CEO Microsoft Corporation In this revelatory book Don and Alex Tapscott bring us a brilliantly researched highly readable and essential book about the technology driving the future of the economy Blockchain is the ingeniously simple revolutionary protocol that allows transactions to be simultaneously anonymous and secure by maintaining a tamperproof public ledger of value Though it's best known as the technology that drives bitcoin and other digital currencies it also has the potential to go far beyond currency to record virtually everything of value to humankind from birth and death certificates to insurance claims land titles and even votes As with major paradigm shifts that preceded it blockchain technology will create winners and losers This book shines a light on where it can lead us in the next decade and beyond

We Count, We Matter Christopher Steed,2018-02-05 This book examines the meaning of Brexit the election of Trump and the rising tide of populist revolt on the right amidst the collapse of the left Exploring the reaction against the establishment or the system the author contends that we are witnessing a new divide between those who wish to see an interconnected world and those who seek distance as transport and technology shrink the world we witness a backlash that favours protectionism and opposes immigration Distance is the new frontier for some remote players are rejected in favour of identities closer to home This divide plays out in relation to the notion of face as individuals react to faceless organisations and processes such as globalisation and automation responding to a sense of alienation on social media and developing a conception of themselves as networked individuals Thus we move towards a type of society characterised not by honour and dishonour or right and wrong but by voice and choice A fascinating and very accessible analysis of the divisions and transformations that have come to dominate the contemporary landscape this book will appeal to political leaders and social scientists with interests in globalisation social movements and social theory

Smart Green World? Steffen Lange,Tilman Santarius,2020-05-07 In this book Steffen Lange and Tilman Santarius investigate how digitalization influences environmental and social sustainability The information revolution is currently changing the daily lives of billions of people worldwide At the same time the current economic model and consumerist lifestyle needs to be radically transformed if society is to overcome the challenges humanity is facing on a finite planet Can the much discussed disruption potential of digitalization be harnessed for this purpose Smart Green World provides guiding principles for a sustainable digital society and develops numerous hands on proposals for how digitalization can be shaped to become a driving force for social transformation For instance the authors explain why more digitalization is needed to realize the transition towards 100% renewable energy and show how this can be achieved without sacrificing privacy They analyze how the information revolution can transform consumption patterns mobility habits and industry structures instead of

fostering the consumption of unneeded stuff due to personalized commercials and the acceleration of life The authors reveal how Artificial Intelligence and the Industrial Internet of Things pose novel environmental challenges and contribute to a polarization of income but they also demonstrate how the internet can be restored to its status as a commons with users taking priority and society at large reaping the benefits of technological change in a most democratic way Providing a comprehensive and practical assessment of both social and environmental opportunities and challenges of digitalization Smart Green World Making Digitalization Work for Sustainability will be of great interest to all those studying the complex interrelationship of the twenty first century megatrends of digitalization and decarbonization

The Importance of Culture Change in Transformation Processes* Parvin Abdurahmanov,2020-12-29 Master s Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 94 110 University of Rome Tor Vergata language English abstract This thesis deals with Big Data as a key driver of Change Management and the importance of Culture Change in transformation processes It aims to answer the following questions What is the Fourth Industrial Revolution s enabling technology that companies need to concentrate on extraction value in the phase of volatility and uncertainty How can companies use change management theories and practices to stay competitive and agile How do companies deal with the resistance to change What is the role of Culture Change Throughout the research the Industry 4 0 as the background and central statue behind der study is examined Change Management and Big Data are explored broadly in primary academic sources This research contributes to the literature by providing a comprehensive picture of the essential determinants of successful change management that connects the gab between the different aspects raised in the literature The world is transforming every day customer needs are changing technology is advancing and the economy is evolving Businesses who fail to embrace change can easily wind up as dinosaurs This study analyses decisive change drivers coming with Industry 4 0 particularly Big Data The core to

effectively proceeding Industry 4.0 is to move from a traditional waterfall concept to an agile manner. Effective change management is crucial. Big Data transformations require an innovative way of thinking about how change impacts people, culture, organisations, processes, and more. While resistance is the normal human reaction in times of change, Culture Change is critically essential to transformation and can mitigate much of the resistance. Digital transformation is not mainly about technology; it is about agility. Organisations' culture plays a decisive role in the digital transformation of every business.
