William Frangipane,2017-03-28 This is the story of the middle two generations of the 3 series the E36 and E46 generations  
By the start of the 1990s the sports sedan was an established car type just like the muscle car minivan or SUV This is thanks  
to BMW which created the class with its first two generations of the 3 series Every other car company had to have one  
especially makers of upscale automobiles Therefore BMW had its hands full when it came time to create the third rendition of  
this class creating car So the company went out and boldly designed and built a completely new car the E36 as the third  
generation of 3 series is called The car reached a note of perfection in looks handling and choices This was despite the huge  
corporate problems BMW was having at the time The fourth generation of the 3 series the E46 was much more of a subtle  
change from the E36 This bit with BMW s philosophy of only making radical changes to its cars every other generation  
Although not much different looking on the outside the newer generation 3 series now had even more features and options  
for the sports sedan buyer *BMW 320-323-325 Series 3 6-Cylinder Cars 1977-90-GP* R.M. Clarke,1992-10-19 The BMW  
small six was developed in response to customer demand for more performance in the 3 series and was announced in  
September 1977 BMW exploited the theme cleverly adding four door cabriolet and estate versions and granting factory  
approval to performance tuners Alpina The performance would satisfy the most demanding driver and throughout the 1980s  
kept the 3 series BMWs in the forefront of desirable and practical sporting machinery This is a collection of contemporary
