

## ELEMENTS OF A GRID

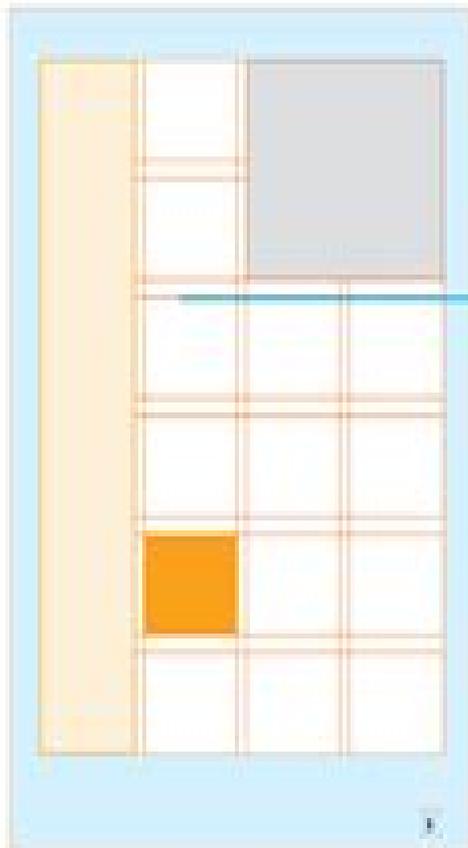

### 1. Know the Components

The main components of a grid are margins, columns, columns, leading, tracking, gutter lines, and baselines. Starting with a page that is four pages wide and four pages high, let's see how these components work together to create a grid.

**MARGINS** are vertical columns that define the width of the page. The width and number of margins on a page or across the entire document are determined by the content.

**MODULES** are individual elements, typically, repeated across a grid. Consistent modules can create columns and rows of varying sizes.

**MARGINS** are the outer edges. They represent the amount of space between the text and the page content. Margins can also house secondary information, such as notes and captions.

**MARGINS** are groups of columns or rows that can be used to create space for captions, images, or other elements.

**FLYLINE** is a horizontal line that runs across the page. It is used to create space for captions, images, or other elements.

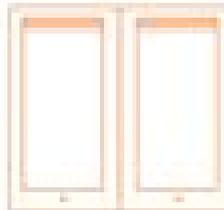

**MARGINS** are the outer edges. They represent the amount of space between the text and the page content. Margins can also house secondary information, such as notes and captions.

## BASIC GRID DIAGRAMS

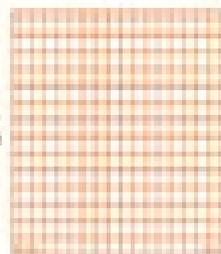

### 2. Learn the Basic Structures

Although the diagrams below show common structures, there are additional variations on the basic configurations. The illustrations guide the designer and help them select layout from columns to the grid.

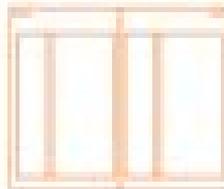

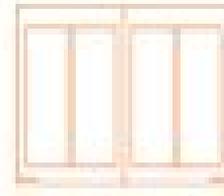

**1 COLUMN GRID** is a primary grid for content. It is used for text, images, and other elements. The width of the grid is determined by the content.

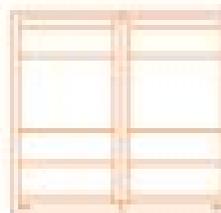

**2 COLUMN GRID** is used for content. It is used for text, images, and other elements. The width of the grid is determined by the content.

**2 COLUMN GRID** is used for content. It is used for text, images, and other elements. The width of the grid is determined by the content.

**3 COLUMN GRID** is used for content. It is used for text, images, and other elements. The width of the grid is determined by the content.

**4 COLUMN GRID** is used for content. It is used for text, images, and other elements. The width of the grid is determined by the content.

**5 COLUMN GRID** is used for content. It is used for text, images, and other elements. The width of the grid is determined by the content.
