

JURISPRUDENCE NOTES

WHAT IS JURISPRUDENCE?

In a broad sense, the term jurisprudence may be applied to cover the whole range of enquiries about the nature and significance of law. In a narrow sense and the more appropriate sense to us, it covers the general intellectual enquiries about law other than the technical issues on specific propositions of law.

Jurisprudence involves the study of the general theoretical questions about the nature of the law and legal systems, about relationship of law to justice, the relationship of law to morality and about the social nature of the law.

It is clear that jurisprudence focuses on a critical analysis of various issues surrounding law. The following questions will be extensively dealt with during the course;

1. What is law?
2. Does the law serve its purpose?
3. What is the purpose of law?
4. What is the relationship between law and morality?
5. What is the relationship between law and justice?
