Nutshell covers the core commands available on common Linux distributions. This isn't a scaled-down quick reference of common commands but a complete reference containing all user programming, administration, and networking commands. Contents include: Commands with complete lists of options; Shell syntax for the bash, csh, and tcsh shells; Pattern matching; emacs, vi, and editing commands; sed and awk commands; Software development commands. This book also documents a wide range of GNU tools for UNIX users who have GNU versions of standard UNIX tools. You'll find all the essential commands you need to run your system as well as all the commands that historically have been included on UNIX systems. Specialized packages included in most distributions of Linux are not covered. Linux in a Nutshell is a must for any Linux user; it weighs less than a stack of manual pages but gives you everything you need for common day-to-day use.

Getting Connected Kevin Dowd, 1996. Written in a readable style, this is the first book for setting up and managing an Internet connection for organizations. It breaks down tasks into easy-to-understand, manageable chunks, such as setting up a simple DNS or World Wide Web server and getting the user started with DNS, sendmail, TCP/IP, and managing Internet servers.

Web Performance Tuning Patrick Killelea, 1998. Get the best performance from the Web. Aimed at Web administrators, content developers, and users, Web Performance Tuning covers general principles of performance, such as network latency and caching. It also gives specific tips on tuning Web browsers, Web servers, operating systems, and hardware for best performance.

Java Servlet Programming Jason Hunter, William Crawford, 1998. Java servlets offer a fast, powerful, portable replacement for CGI scripts. This book covers everything one needs to write effective servlets. Topics include serving dynamic Web content, maintaining state information, session tracking, database connectivity using JDBC, and applet/servlet communication.
