Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Diagnosing and Treating Children and Adolescents Brandé Flamez, Carl J. Sheperis, 2015-09-11
A guide to treating mental health issues in children and adolescents. *Diagnosis and Treatment of Children and Adolescents: A Guide for Mental Health Professionals* is a resource tailored to the particular needs of current and future counselors, behavioral healthcare clinicians, and other helping professionals working with this vulnerable population. With in-depth content broken into two sections, this book first provides a foundation in the diagnostic process by covering the underlying principles of diagnosis and treatment planning and then applies this framework to the DSM 5 categories related to children and adolescents. With research continually reshaping our understanding of mental health, it is critical that mental health professionals make decisions based on evidence-based pathways that include the specialized research around children and adolescents. The leading experts who contributed to this book share contemporary perspectives on developmental considerations, assessment information, presenting symptoms, comorbidity levels, severity, prevalence data, and other relevant factors. Structured content of chapters provides a crosswalk between the DSM 5 and this book. Updated content based upon the changes, additions, and revisions to the DSM 5 that affect diagnosis, assessment, and treatment. Pedagogical features such as learning objectives, case studies, guided practice exercises, and additional resources to support effective learning. *Diagnosis and Treatment of Children and Adolescents: A Guide for Clinical and School Settings* is a critical resource for mental health practitioners and graduate students working toward a career in a mental health profession.

Post-admission Language Assessment of University Students John Read, 2016-08-10
English medium universities around the world face real challenges in ensuring that incoming students have the language and literacy skills they need to cope with the demands of their degree programmes. One response has been a variety of institutional initiatives to assess students after admission in order to identify those with significant needs and advise them on how to enhance their academic language ability. This volume brings together papers from Australia, Canada, Hong Kong, New Zealand, Oman, South Africa, and the United States, written by language assessment specialists who discuss issues in the

design and implementation of these post admission assessments in their own institutions A major theme running through the book is the need to evaluate the validity of such assessments not just on their technical quality but on their impact in terms of giving students access to effective means of developing their language skills and ultimately enhancing their academic achievement
