Rapid Methods and Automation in Microbiology and Immunology Antti Vaehri, Richard C. Tilton, Albert Balows, 2012-12-06 The current diagnostic methods for the great variety of microbial agents affecting health are clearly unsatisfactory New important pathogens have emerged including the agent responsible for bovine spongiform encephalopathy Moreover there is an increasing need for more accurate microbial control of our environment and of the food and water we consume What is needed are rapid sensitive and reliable procedures which on the one hand should be suitable for automation and on the other hand presented in a cost effective version suitable for field use Including new biochemical approaches such as polymerase chain reaction recombinant gene products and synthetic peptides these needs are discussed in these protocols of the RAMI 90 congress
